Pt. 4

Manager, Pension Management Center Manager, or Decision Review Officer, at VA's discretion. An individual who did not participate in the decision being reviewed will conduct this review. Only a decision that has not yet become final (by appellate decision or failure to timely appeal) may be reviewed. Review under this section will encompass only decisions with which the claimant has expressed disagreement in the Notice of Disagreement. The reviewer will consider all evidence of record and applicable law, and will give no deference to the decision being reviewed.

(b) Unless the claimant has requested review under this section with his or her Notice of Disagreement, VA will, upon receipt of the Notice of Disagreement, notify the claimant in writing of his or her right to a review under this section. To obtain such a review, the claimant must request it not later than 60 days after the date VA mails the notice. This 60-day time limit may not be extended. If the claimant fails to request review under this section not later than 60 days after the date VA mails the notice, VA will proceed with the traditional appellate process by issuing a Statement of the Case. A claimant may not have more than one review under this section of the same decision.

(c) The reviewer may conduct whatever development he or she considers necessary to resolve any disagreements in the Notice of Disagreement, consistent with applicable law. This may include an attempt to obtain additional evidence or the holding of an informal conference with the claimant. Upon the request of the claimant, the reviewer will conduct a hearing under §3.103(c).

(d) The reviewer may grant a benefit sought in the claim notwithstanding §3.105(b), but, except as provided in paragraph (e) of this section, may not revise the decision in a manner that is less advantageous to the claimant than the decision under review. A review decision made under this section will include a summary of the evidence, a citation to pertinent laws, a discussion of how those laws affect the decision, and a summary of the reasons for the decision.

- (e) Notwithstanding any other provisions of this section, the reviewer may reverse or revise (even if disadvantageous to the claimant) prior decisions of an agency of original jurisdiction (including the decision being reviewed or any prior decision that has become final due to failure to timely appeal) on the grounds of clear and unmistakable error (see §3.105(a)).
- (f) Review under this section does not limit the appeal rights of a claimant. Unless a claimant withdraws his or her Notice of Disagreement as a result of this review process, VA will proceed with the traditional appellate process by issuing a Statement of the Case.
- (g) This section applies to all claims in which a Notice of Disagreement is filed on or after June 1, 2001.

PART 4—SCHEDULE FOR RATING **DISABILITIES**

Subpart A—General Policy in Rating

Sec.

- 4.1 Essentials of evaluative rating.
- 4.2Interpretation of examination reports.
- 4.3 Resolution of reasonable doubt.
- Evaluation of evidence.
- 4.7 Higher of two evaluations.
- Congenital or developmental defects. 4.9 4.10 Functional impairment.
- 4.13 Effect of change of diagnosis.
- 4.14 Avoidance of pyramiding.
- 4.15 Total disability ratings.
- 4.16 Total disability ratings for compensation based on unemployability of the individual.
- 4.17 Total disability ratings for pension based on unemployability and age of the individual.
- 4.17a Misconduct etiology.
- 4.18 Unemployability.
- 4.19 Age in service-connected claims.
- 4.20 Analogous ratings.
- 4.21 Application of rating schedule.
 - Rating of disabilities aggravated by active service.
- 4.23 Attitude of rating officers.
- 4.24 Correspondence.
- 4.25 Combined ratings table.
- Bilateral factor. 4.26
- Use of diagnostic code numbers. 4.27
- Prestabilization rating from date of discharge from service.

- 4.29 Ratings for service-connected disabilities requiring hospital treatment or observation.
- 4.30 Convalescent ratings.
- 4.31 Zero percent evaluations.

Subpart B—Disability Ratings

THE MUSCULOSKELETAL SYSTEM

- 4.40 Functional loss.
- 4.41 History of injury.
- 4.42 Complete medical examination of injury cases.
- 4.43 Osteomyelitis.
- 4.44 The bones.
- 4.45 The joints.
- 4.46 Accurate measurement.
- 4.47-4.54 [Reserved]
- 4.55 Principles of combined ratings for muscle injuries.
- 4.56 Evaluation of muscle disabilities.
- 4.57 Static foot deformities.
- 4.58 Arthritis due to strain.
- 4.59 Painful motion.
- 4.60 [Reserved]
- 4.61 Examination
- 4.62 Circulatory disturbances.
- 4.63 Loss of use of hand or foot.
- 4.64 Loss of use of both buttocks.
- 4.65 [Reserved]
- 4.66 Sacroiliac joint.
- 4.67 Pelvic bones.
- 4.68 Amputation rule.
- 4.69 Dominant hand. 4.70 Inadequate examinations.
- 4.71 Measurement of ankylosis and joint motion.
- 4.71a Schedule of ratings—musculoskeletal system.
- 4.72 [Reserved]
- 4.73 Schedule of ratings—muscle injuries.

THE ORGANS OF SPECIAL SENSE

- 4.75 General considerations for evaluating visual impairment.
- 4.76 Visual acuity.
- 4.76a Computation of average concentric contraction of visual fields.
- 4.77 Visual fields.
- 4.78 Muscle function.
- 4.79 Schedule of ratings—eye.
- 4.80–4.84 [Reserved]

IMPAIRMENT OF AUDITORY ACUITY

- 4.85 Evaluation of hearing impairment.
- 4.86 Exceptional patterns of hearing impairment.
- 4.87 Schedule of ratings—ear.
- 4.87a Schedule of ratings—other sense organs

INFECTIOUS DISEASES, IMMUNE DISORDERS AND NUTRITIONAL DEFICIENCIES

- 4.88 [Reserved]
- 4.88a Chronic fatigue syndrome.

- 4.88b Schedule of ratings—infectious diseases, immune disorders and nutritional deficiencies.
- 4.88c Ratings for inactive nonpulmonary tuberculosis initially entitled after August 19, 1968.
- 4.89 Ratings for inactive nonpulmonary tuberculosis in effect on August 19, 1968.

THE RESPIRATORY SYSTEM

- $\begin{array}{ll} 4.96 & {\rm Special~provisions~regarding~evaluation} \\ & {\rm of~respiratory~conditions.} \end{array}$
- 4.97 Schedule of ratings—respiratory system.

THE CARDIOVASCULAR SYSTEM

- 4.100 Application of the evaluation criteria for diagnostic codes 7000–7007, 7011, and 7015–7020.
- 4.101-4.103 [Reserved]
- 4.104 Schedule of ratings—cardiovascular system.

THE DIGESTIVE SYSTEM

- 4.110 Ulcers.
- 4.111 Postgastrectomy syndromes.
- 4.112 Weight loss.
- 4.113 Coexisting abdominal conditions.
- 4.114 Schedule of ratings—digestive system.

THE GENITOURINARY SYSTEM

- 4.115 Nephritis.
- 4.115a Ratings of the genitourinary system—dysfunctions.
- 4.115b Ratings of the genitourinary system—diagnoses.

GYNECOLOGICAL CONDITIONS AND DISORDERS OF THE BREAST

4.116 Schedule of ratings—gynecological conditions and disorders of the breast.

THE HEMIC AND LYMPHATIC SYSTEMS

4.117 Schedule of ratings—hemic and lymphatic systems.

THE SKIN

4.118 Schedule of ratings-skin.

THE ENDOCRINE SYSTEM

4.119 Schedule of ratings—endocrine system

NEUROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS

- 4.120 Evaluations by comparison.
- 4.121 Identification of epilepsy.
- 4.122 Psychomotor epilepsy.
- 4.123 Neuritis, cranial or peripheral.
- 4.124 Neuralgia, cranial or peripheral.4.124a Schedule of ratings—neurological conditions and convulsive disorders.

MENTAL DISORDERS

4.125 Diagnosis of mental disorders.

- 4.126 Evaluation of disability from mental disorders
- 4.127 Intellectual disability (intellectual developmental disorder) and personality disorders.
- 4.128 Convalescence ratings following extended hospitalization.
- 4.129 Mental disorders due to traumatic
- 4.130 Schedule of ratings-Mental disorders.

DENTAL AND ORAL CONDITIONS

Subpart A—General Policy in Ratina

§4.1 Essentials of evaluative rating.

This rating schedule is primarily a guide in the evaluation of disability resulting from all types of diseases and injuries encountered as a result of or incident to military service. The percentage ratings represent as far as can practicably be determined the average impairment in earning capacity resulting from such diseases and injuries and their residual conditions in civil occupations. Generally, the degrees of disability specified are considered adequate to compensate for considerable loss of working time from exacerbations or illnesses proportionate to the severity of the several grades of disability. For the application of this schedule, accurate and fully descriptive medical examinations are required, with emphasis upon the limitation of activity imposed by the disabling condition. Over a period of many years, a veteran's disability claim may require reratings in accordance with changes in laws, medical knowledge and his or her physical or mental condition. It is thus essential, both in the examination and in the evaluation of disability, that each disability be viewed in relation to its history.

[41 FR 11292, Mar. 18, 1976]

§ 4.2 Interpretation of examination reports.

Different examiners, at different times, will not describe the same disability in the same language. Features of the disability which must have persisted unchanged may be overlooked or a change for the better or worse may not be accurately appreciated or described. It is the responsibility of the rating specialist to interpret reports of examination in the light of the whole recorded history, reconciling the various reports into a consistent picture so that the current rating may accurately reflect the elements of disability present. Each disability must be considered from the point of view of the veteran working or seeking work. If a diagnosis is not supported by the findings on the examination report or if the report does not contain sufficient detail, it is incumbent upon the rating board to return the report as inadequate for evaluation purposes.

[41 FR 11292, Mar. 18, 1976]

§4.3 Resolution of reasonable doubt.

It is the defined and consistently applied policy of the Department of Veterans Affairs to administer the law under a broad interpretation, consistent, however, with the facts shown in every case. When after careful consideration of all procurable and assembled data, a reasonable doubt arises regarding the degree of disability such doubt will be resolved in favor of the claimant. See §3.102 of this chapter.

[40 FR 42535, Sept. 15, 1975]

§ 4.6 Evaluation of evidence.

The element of the weight to be accorded the character of the veteran's service is but one factor entering into the considerations of the rating boards in arriving at determinations of the evaluation of disability. Every element in any way affecting the probative value to be assigned to the evidence in each individual claim must be thoroughly and conscientiously studied by each member of the rating board in the light of the established policies of the

Department of Veterans Affairs to the end that decisions will be equitable and just as contemplated by the requirements of the law.

§ 4.7 Higher of two evaluations.

Where there is a question as to which of two evaluations shall be applied, the higher evaluation will be assigned if the disability picture more nearly approximates the criteria required for that rating. Otherwise, the lower rating will be assigned.

§ 4.9 Congenital or developmental defects.

Mere congenital or developmental defects, absent, displaced or supernumerary parts, refractive error of the eye, personality disorder and mental deficiency are not diseases or injuries in the meaning of applicable legislation for disability compensation purposes.

 $[41~{\rm FR}~11292,\,{\rm Mar}.~18,\,1976]$

§4.10 Functional impairment.

The basis of disability evaluations is the ability of the body as a whole, or of the psyche, or of a system or organ of the body to function under the ordinary conditions of daily life including employment. Whether the upper or lower extremities, the back or abdominal wall, the eyes or ears, or the cardiovascular, digestive, or other system, or psyche are affected, evaluations are based upon lack of usefulness, of these parts or systems, especially in self-support. This imposes upon the medical examiner the responsibility of furnishing, in addition to the etiological, anatomical, pathological, laboratory and prognostic data required for ordinary medical classification, full description of the effects of disability upon the person's ordinary activity. In this connection, it will be remembered that a person may be too disabled to engage in employment although he or she is up and about and fairly comfortable at home or upon limited activ-

[41 FR 11292, Mar. 18, 1976]

§4.13 Effect of change of diagnosis.

The repercussion upon a current rating of service connection when change

is made of a previously assigned diagnosis or etiology must be kept in mind. The aim should be the reconciliation and continuance of the diagnosis or etiology upon which service connection for the disability had been granted. The relevant principle enunciated in §4.125, entitled "Diagnosis of mental disorders," should have careful attention in this connection. When any change in evaluation is to be made, the rating agency should assure itself that there has been an actual change in the conditions, for better or worse, and not merely a difference in thoroughness of the examination or in use of descriptive terms. This will not, of course, preclude the correction of erroneous ratings, nor will it preclude assignment of a rating in conformity with §4.7.

[29 FR 6718, May 22, 1964, as amended at 61 FR 52700, Oct. 8, 1996]

§4.14 Avoidance of pyramiding.

The evaluation of the same disability under various diagnoses is to be avoided. Disability from injuries to the muscles, nerves, and joints of an extremity may overlap to a great extent, so that special rules are included in the appropriate bodily system for their evaluation. Dyspnea, tachycardia, nervousness, fatigability, etc., may result from many causes; some may be service connected, others, not. Both the use of manifestations not resulting from service-connected disease or injury in establishing the service-connected evaluation, and the evaluation of the same manifestation under different diagnoses are to be avoided.

§4.15 Total disability ratings.

The ability to overcome the handicap of disability varies widely among individuals. The rating, however, is based primarily upon the average impairment in earning capacity, that is, upon the economic or industrial handicap which must be overcome and not from individual success in overcoming it. However, full consideration must be given to unusual physical or mental effects in individual cases, to peculiar effects of occupational activities, to defects in physical or mental endowment preventing the usual amount of success

in overcoming the handicap of disability and to the effect of combinations of disability. Total disability will be considered to exist when there is present any impairment of mind or body which is sufficient to render it impossible for the average person to follow a substantially gainful occupation; Provided, That permanent total disability shall be taken to exist when the impairment is reasonably certain to continue throughout the life of the disabled person. The following will be considered to be permanent total disability: the permanent loss of the use of both hands, or of both feet, or of one hand and one foot, or of the sight of both eyes, or becoming permanently helpless or permanently bedridden. Other total disability ratings are scheduled in the various bodily systems of this schedule.

§ 4.16 Total disability ratings for compensation based on unemployability of the individual.

(a) Total disability ratings for compensation may be assigned, where the schedular rating is less than total, when the disabled person is, in the judgment of the rating agency, unable to secure or follow a substantially gainful occupation as a result of service-connected disabilities: Provided That, if there is only one such disability, this disability shall be ratable at 60 percent or more, and that, if there are two or more disabilities, there shall be at least one disability ratable at 40 percent or more, and sufficient additional disability to bring the combined rating to 70 percent or more. For the above purpose of one 60 percent disability, or one 40 percent disability in combination, the following will be considered as one disability: (1) Disabilities of one or both upper extremities, or of one or both lower extremities, including the bilateral factor, if applicable, (2) disabilities resulting from common etiology or a single accident, (3) disabilities affecting a single body system, e.g. orthopedic, digestive, rescardiovascular-renal, niratory. neuropsychiatric, (4) multiple injuries incurred in action, or (5) multiple disabilities incurred as a prisoner of war. It is provided further that the existence or degree of nonservice-connected

previous disabilities orunemployability status will be disregarded where the percentages referred to in this paragraph for the service-connected disability or disabilities are met and in the judgment of the rating agency such service-connected disabilities render the veteran unemployable. Marginal employment shall not be considered substantially gainful employment. For purposes of this section, marginal employment generally shall be deemed to exist when a veteran's earned annual income does not exceed the amount established by the U.S. Department of Commerce, Bureau of the Census, as the poverty threshold for one person. Marginal employment may also be held to exist, on a facts found basis (includes but is not limited to employment in a protected environment such as a family business or sheltered workshop), when earned annual income exceeds the poverty threshold. Consideration shall be given in all claims to the nature of the employment and the reason for termination.

(Authority: 38 U.S.C. 501)

(b) It is the established policy of the Department of Veterans Affairs that all veterans who are unable to secure and follow a substantially gainful occupation by reason of service-connected disabilities shall be rated totally disabled. Therefore, rating boards should submit to the Director, Compensation Service, for extra-schedular consideration all cases of veterans who are unemployable by reason of service-connected disabilities, but who fail to meet the percentage standards set forth in paragraph (a) of this section. The rating board will include a full statement as to the veteran's serviceconnected disabilities, employment history, educational and vocational attainment and all other factors having a bearing on the issue.

[40 FR 42535, Sept. 15, 1975, as amended at 54 FR 4281, Jan. 30, 1989; 55 FR 31580, Aug. 3, 1990; 58 FR 39664, July 26, 1993; 61 FR 52700, Oct. 8, 1996; 79 FR 2100, Jan. 13, 2014]

§ 4.17 Total disability ratings for pension based on unemployability and age of the individual.

All veterans who are basically eligible and who are unable to secure and

follow a substantially gainful occupation by reason of disabilities which are likely to be permanent shall be rated as permanently and totally disabled. For the purpose of pension, the permanence of the percentage requirements of §4.16 is a requisite. When the percentage requirements are met, and the disabilities involved are of a permanent nature, a rating of permanent and total disability will be assigned if the veteran is found to be unable to secure and follow substantially gainful employment by reason of such disability. Prior employment or unemployment status is immaterial if in the judgment of the rating board the veteran's disabilities render him or her unemployable. In making such determinations, the following guidelines will be used:

- (a) Marginal employment, for example, as a self-employed farmer or other person, while employed in his or her own business, or at odd jobs or while employed at less than half the usual remuneration will not be considered incompatible with a determination of unemployability, if the restriction, as to securing or retaining better employment, is due to disability.
- (b) Claims of all veterans who fail to meet the percentage standards but who meet the basic entitlement criteria and are unemployable, will be referred by the rating board to the Veterans Service Center Manager or the Pension Management Center Manager under §3.321(b)(2) of this chapter.

(Authority: 38 U.S.C. 1155; 38 U.S.C. 3102)

[43 FR 45348, Oct. 2, 1978, as amended at 56 FR 57985, Nov. 15, 1991; 71 FR 28586, May 17, 2006; 74 FR 26959, June 5, 2009]

§ 4.17a Misconduct etiology.

A permanent and total disability rating under the provisions of §§ 4.15, 4.16 and 4.17 will not be precluded by reason of the coexistence of misconduct disability when:

- (a) A veteran, regardless of employment status, also has innocently acquired 100 percent disability, or
- (b) Where unemployable, the veteran has other disabilities innocently acquired which meet the percentage requirements of §§4.16 and 4.17 and would render, in the judgment of the rating agency, the average person unable to

secure or follow a substantially gainful occupation.

[40 FR 42536, Sept. 15, 1975, as amended at 43 FR 45349, Oct. 2, 1978]

§4.18 Unemployability.

A veteran may be considered as unemployable upon termination of employment which was provided on account of disability, or in which special consideration was given on account of the same, when it is satisfactorily shown that he or she is unable to secure further employment. With amputations, sequelae of fractures and other residuals of traumatism shown to be of static character, a showing of continuous unemployability from date of incurrence, or the date the condition reached the stabilized level, is a general requirement in order to establish the fact that present unemployability is the result of the disability. However, consideration is to be given to the circumstances of employment in individual claims, and, if the employment was only occasional, intermittent, tryout or unsuccessful, or eventually terminated on account of the disability, present unemployability may be attributed to the static disability. Where unemployability for pension previously has been established on the basis of combined service-connected and nonservice-connected disabilities and the service-connected disability or disabilities have increased in severity, §4.16 is for consideration.

[40 FR 42536, Sept. 15, 1975, as amended at 43 FR 45349, Oct. 2, 1978]

§ 4.19 Age in service-connected claims.

Age may not be considered as a factor in evaluating service-connected disability; and unemployability, in service-connected claims, associated with advancing age or intercurrent disability, may not be used as a basis for a total disability rating. Age, as such, is a factor only in evaluations of disability not resulting from service, *i.e.*, for the purposes of pension.

[29 FR 6718, May 22, 1964, as amended at 43 FR 45349, Oct. 2, 1978]

§ 4.20 Analogous ratings.

When an unlisted condition is encountered it will be permissible to rate

under a closely related disease or injury in which not only the functions affected, but the anatomical localization and symptomatology are closely analogous. Conjectural analogies will be avoided, as will the use of analogous ratings for conditions of doubtful diagnosis, or for those not fully supported by clinical and laboratory findings. Nor will ratings assigned to organic diseases and injuries be assigned by analogy to conditions of functional origin.

§4.21 Application of rating schedule.

In view of the number of atypical instances it is not expected, especially with the more fully described grades of disabilities, that all cases will show all the findings specified. Findings sufficiently characteristic to identify the disease and the disability therefrom, and above all, coordination of rating with impairment of function will, however, be expected in all instances.

[41 FR 11293, Mar. 18, 1976]

§ 4.22 Rating of disabilities aggravated by active service.

In cases involving aggravation by active service, the rating will reflect only the degree of disability over and above the degree existing at the time of entrance into the active service, whether the particular condition was noted at the time of entrance into the active service, or it is determined upon the evidence of record to have existed at that time. It is necessary therefore, in all cases of this character to deduct from the present degree of disability the degree, if ascertainable, of the disability existing at the time of entrance into active service, in terms of the rating schedule, except that if the disability is total (100 percent) no deduction will be made. The resulting difference will be recorded on the rating sheet. If the degree of disability at the time of entrance into the service is not ascertainable in terms of the schedule, no deduction will be made.

§ 4.23 Attitude of rating officers.

It is to be remembered that the majority of applicants are disabled persons who are seeking benefits of law to which they believe themselves entitled. In the exercise of his or her functions, rating officers must not allow their

personal feelings to intrude; an antagonistic, critical, or even abusive attitude on the part of a claimant should not in any instance influence the officers in the handling of the case. Fairness and courtesy must at all times be shown to applicants by all employees whose duties bring them in contact, directly or indirectly, with the Department's claimants.

[41 FR 11292, Mar. 18, 1976]

§ 4.24 Correspondence.

All correspondence relative to the interpretation of the schedule for rating disabilities, requests for advisory opinions, questions regarding lack of clarity or application to individual cases involving unusual difficulties, will be addressed to the Director, Compensation Service. A clear statement will be made of the point or points upon which information is desired, and the complete case file will be simultaneously forwarded to Central Office. Rating agencies will assure themselves that the recent report of physical examination presents an adequate picture of the claimant's condition. Claims in regard to which the schedule evaluations are considered inadequate or excessive, and errors in the schedule will be similarly brought to attention.

[41 FR 11292, Mar. 18, 1976, as amended at 79 FR 2100, Jan. 13, 2014]

§4.25 Combined ratings table.

Table I, Combined Ratings Table, results from the consideration of the efficiency of the individual as affected first by the most disabling condition, then by the less disabling condition, then by other less disabling conditions, if any, in the order of severity. Thus, a person having a 60 percent disability is considered 40 percent efficient. Proceeding from this 40 percent efficiency, the effect of a further 30 percent disability is to leave only 70 percent of the efficiency remaining after consideration of the first disability, or 28 percent efficiency altogether. The individual is thus 72 percent disabled, as shown in table I opposite 60 percent and under 30 percent.

(a) To use table I, the disabilities will first be arranged in the exact order of their severity, beginning with the

greatest disability and then combined with use of table I as hereinafter indicated. For example, if there are two disabilities, the degree of one disability will be read in the left column and the degree of the other in the top row, whichever is appropriate. The figures appearing in the space where the column and row intersect will represent the combined value of the two. This combined value will then be converted to the nearest number divisible by 10, and combined values ending in 5 will be adjusted upward. Thus, with a 50 percent disability and a 30 percent disability, the combined value will be found to be 65 percent, but the 65 percent must be converted to 70 percent to represent the final degree of disability. Similarly, with a disability of 40 percent, and another disability of 20 percent, the combined value is found to be 52 percent, but the 52 percent must be converted to the nearest degree divisible by 10, which is 50 percent. If there are more than two disabilities, the disabilities will also be arranged in the exact order of their severity and the combined value for the first two will be found as previously described for two disabilities. The combined value, exactly as found in table I, will be combined with the degree of the third disability (in order of severity). The combined value for the three disabilities will be found in the space where the column and row intersect, and if there are only three disabilities will be converted to the nearest degree divisible by 10, adjusting final 5's upward. Thus, if there are three disabilities ratable at 60 percent, 40 percent, and 20 percent, respectively, the combined value for the first two will be found opposite 60 and under 40 and is 76 percent. This 76 will be combined with 20 and the combined value for the three is 81 percent. This combined value will be converted to the nearest degree divisible by 10 which is 80 percent. The same procedure will be employed when there are four or more disabilities. (See table I).

(b) Except as otherwise provided in this schedule, the disabilities arising from a single disease entity, e.g., arthritis, multiple sclerosis, cerebrovascular accident, etc., are to be rated separately as are all other disabiling conditions, if any. All disabilities are then to be combined as described in paragraph (a) of this section. The conversion to the nearest degree divisible by 10 will be done only once per rating decision, will follow the combining of all disabilities, and will be the last procedure in determining the combined degree of disability.

TABLE I—COMBINED RATINGS TABLE

	10	20	30	40	50	60	70	80	90

(Authority: 38 U.S.C. 1155)

[41 FR 11293, Mar. 18, 1976, as amended at 54 FR 27161, June 28, 1989; 54 FR 36029, Aug. 31, 1989]

§4.26 Bilateral factor.

When a partial disability results from disease or injury of both arms, or of both legs, or of paired skeletal muscles, the ratings for the disabilities of the right and left sides will be combined as usual, and 10 percent of this value will be added (*i.e.*, not combined) before proceeding with further combinations, or converting to degree of

disability. The bilateral factor will be applied to such bilateral disabilities before other combinations are carried out and the rating for such disabilities including the bilateral factor in this section will be treated as 1 disability for the purpose of arranging in order of severity and for all further combinations. For example, with disabilities evaluated at 60 percent, 20 percent, 10 percent and 10 percent (the two 10's

representing bilateral disabilities), the order of severity would be 60, 21 and 20. The 60 and 21 combine to 68 percent and the 68 and 20 to 74 percent, converted to 70 percent as the final degree of disability.

(a) The use of the terms "arms" and "legs" is not intended to distinguish between the arm, forearm and hand, or the thigh, leg, and foot, but relates to the upper extremities and lower extremities as a whole. Thus with a compensable disability of the right thigh, for example, amputation, and one of the left foot, for example, pes planus, the bilateral factor applies, and similarly whenever there are compensable disabilities affecting use of paired extremities regardless of location or specified type of impairment.

(b) The correct procedure when applying the bilateral factor to disabilities affecting both upper extremities and both lower extremities is to combine the ratings of the disabilities affecting the 4 extremities in the order of their individual severity and apply the bilateral factor by adding, not combining, 10 percent of the combined value thus attained.

(c) The bilateral factor is not applicable unless there is partial disability of compensable degree in each of 2 paired extremities, or paired skeletal muscles.

§4.27 Use of diagnostic code numbers.

The diagnostic code numbers appearing opposite the listed ratable disabilities are arbitrary numbers for the purpose of showing the basis of the evaluation assigned and for statistical analysis in the Department of Veterans Affairs, and as will be observed, extend from 5000 to a possible 9999. Great care will be exercised in the selection of the applicable code number and in its citation on the rating sheet. No other numbers than these listed or hereafter furnished are to be employed for rating purposes, with an exception as described in this section, as to unlisted conditions. When an unlisted disease, injury, or residual condition is encountered, requiring rating by analogy, the diagnostic code number will be "builtup" as follows: The first 2 digits will be selected from that part of the schedule most closely identifying the part, or system, of the body involved; the last 2 digits will be "99" for all unlisted conditions. This procedure will facilitate a close check of new and unlisted conditions, rated by analogy. In the selection of code numbers, injuries will generally be represented by the number assigned to the residual condition on the basis of which the rating is determined. With diseases, preference is to be given to the number assigned to the disease itself; if the rating is determined on the basis of residual conditions, the number appropriate to the residual condition will be added, preceded by a hyphen. Thus, rheumatoid (atrophic) arthritis rated as ankylosis of the lumbar spine should be coded "5002-5240." In this way, the exact source of each rating can be easily identified. In the citation of disabilities on rating sheets, the diagnostic terminology will be that of the medical examiner, with no attempt to translate the terms into schedule nomenclature. Residuals of diseases or therapeutic procedures will not be cited without reference to the basic disease.

[41 FR 11293, Mar. 18, 1976, as amended at 70 FR 75399, Dec. 20, 2005]

§ 4.28 Prestabilization rating from date of discharge from service.

The following ratings may be assigned, in lieu of ratings prescribed elsewhere, under the conditions stated for disability from any disease or injury. The prestabilization rating is not to be assigned in any case in which a total rating is immediately assignable under the regular provisions of the schedule or on the basis of individual unemployability. The prestabilization 50-percent rating is not to be used in any case in which a rating of 50 percent or more is immediately assignable under the regular provisions.

	Rating
Unstabilized condition with severe disability— Substantially gainful employment is not feasible or advisable	100
Material impairment of employability likely	50

NOTE (1): Department of Veterans Affairs examination is not required prior to assignment of prestabilization ratings; however, the fact that examination was accomplished

will not preclude assignment of these benefits. Prestabilization ratings are for assignment in the immediate postdischarge period. They will continue for a 12-month period following discharge from service However. prestabilization ratings may be changed to a regular schedular total rating or one authorizing a greater benefit at any time. In each prestabilization rating an examination will be requested to be accomplished not earlier than 6 months nor more than 12 months following discharge. In those prestabilization ratings in which following examination reduction in evaluation is found to be warranted, the higher evaluation will be continued to the end of the 12th month following discharge or to the end of the period provided under §3.105(e) of this chapter, whichever is later. Special monthly compensation should be assigned concurrently in these cases whenever records are adequate to establish entitlement.

NOTE (2): Diagnosis of disease, injury, or residuals will be cited, with diagnostic code number assigned from this rating schedule for conditions listed therein.

[35 FR 11906, July 24, 1970]

§ 4.29 Ratings for service-connected disabilities requiring hospital treatment or observation.

A total disability rating (100 percent) will be assigned without regard to other provisions of the rating schedule when it is established that a service-connected disability has required hospital treatment in a Department of Veterans Affairs or an approved hospital for a period in excess of 21 days or hospital observation at Department of Veterans Affairs expense for a service-connected disability for a period in excess of 21 days.

(a) Subject to the provisions of paragraphs (d), (e), and (f) of this section this increased rating will be effective the first day of continuous hospitalization and will be terminated effective the last day of the month of hospital discharge (regular discharge or release to non-bed care) or effective the last day of the month of termination of treatment or observation for the service-connected disability. A temporary release which is approved by an attending Department of Veterans Affairs physician as part of the treatment plan will not be considered an absence.

(1) An authorized absence in excess of 4 days which begins during the first 21 days of hospitalization will be regarded as the equivalent of hospital discharge

effective the first day of such authorized absence. An authorized absence of 4 days or less which results in a total of more than 8 days of authorized absence during the first 21 days of hospitalization will be regarded as the equivalent of hospital discharge effective the ninth day of authorized absence.

(2) Following a period of hospitalization in excess of 21 days, an authorized absence in excess of 14 days or a third consecutive authorized absence of 14 days will be regarded as the equivalent of hospital discharge and will interrupt hospitalization effective on the last day of the month in which either the authorized absence in excess of 14 days or the third 14 day period begins, except where there is a finding that convalescence is required as provided by paragraph (e) or (f) of this section. The termination of these total ratings will not be subject to §3.105(e) of this chapter.

(b) Notwithstanding that hospital admission was for disability not connected with service, if during such hospitalization, hospital treatment for a service-connected disability is instituted and continued for a period in excess of 21 days, the increase to a total rating will be granted from the first day of such treatment. If service connection for the disability under treatment is granted after hospital admission, the rating will be from the first day of hospitalization if otherwise in order.

(c) The assignment of a total disability rating on the basis of hospital treatment or observation will not preclude the assignment of a total disability rating otherwise in order under other provisions of the rating schedule, and consideration will be given to the propriety of such a rating in all instances and to the propriety of its continuance after discharge. Particular attention, with a view to proper rating under the rating schedule, is to be given to the claims of veterans discharged from hospital, regardless of length of hospitalization, with indications on the final summary of expected confinement to bed or house, or to inability to work with requirement of frequent care of physician or nurse at home.

- (d) On these total ratings Department of Veterans Affairs regulations governing effective dates for increased benefits will control.
- (e) The total hospital rating if convalescence is required may be continued for periods of 1, 2, or 3 months in addition to the period provided in paragraph (a) of this section.
- (f) Extension of periods of 1, 2 or 3 months beyond the initial 3 months may be made upon approval of the Veterans Service Center Manager.
- (g) Meritorious claims of veterans who are discharged from the hospital with less than the required number of days but need post-hospital care and a prolonged period of convalescence will be referred to the Director, Compensation Service, under §3.321(b)(1) of this chapter.

[29 FR 6718, May 22, 1964, as amended at 41 FR 11294, Mar. 18, 1976; 41 FR 34256, Aug. 13, 1976; 54 FR 4281, Jan. 30, 1989; 54 FR 34981, Aug. 23, 1989; 71 FR 28586, May 17, 2006; 79 FR 2100, Jan. 13, 2014]

§ 4.30 Convalescent ratings.

A total disability rating (100 percent) will be assigned without regard to other provisions of the rating schedule when it is established by report at hospital discharge (regular discharge or release to non-bed care) or outpatient release that entitlement is warranted under paragraph (a) (1), (2) or (3) of this section effective the date of hospital admission or outpatient treatment and continuing for a period of 1, 2, or 3 months from the first day of the month following such hospital discharge or outpatient release. The termination of these total ratings will not be subject to §3.105(e) of this chapter. Such total rating will be followed by appropriate schedular evaluations. When the evidence is inadequate to assign a schedular evaluation, a physical examination will be scheduled and considered prior to the termination of a total rating under this section.

- (a) Total ratings will be assigned under this section if treatment of a service-connected disability resulted in:
- (1) Surgery necessitating at least one month of convalescence (Effective as to outpatient surgery March 1, 1989.)

- (2) Surgery with severe postoperative residuals such as incompletely healed surgical wounds, stumps of recent amputations, therapeutic immobilization of one major joint or more, application of a body cast, or the necessity for house confinement, or the necessity for continued use of a wheelchair or crutches (regular weight-bearing prohibited). (Effective as to outpatient surgery March 1, 1989.)
- (3) Immobilization by cast, without surgery, of one major joint or more. (Effective as to outpatient treatment March 10, 1976.)

A reduction in the total rating will not be subject to §3.105(e) of this chapter. The total rating will be followed by an open rating reflecting the appropriate schedular evaluation; where the evidence is inadequate to assign the schedular evaluation, a physcial examination will be scheduled prior to the end of the total rating period.

- (b) A total rating under this section will require full justification on the rating sheet and may be extended as follows:
- (1) Extensions of 1, 2 or 3 months beyond the initial 3 months may be made under paragraph (a) (1), (2) or (3) of this section.
- (2) Extensions of 1 or more months up to 6 months beyond the initial 6 months period may be made under paragraph (a) (2) or (3) of this section upon approval of the Veterans Service Center Manager.

[41 FR 34256, Aug. 13, 1976, as amended at 54 FR 4281, Jan. 30, 1989; 71 FR 28586, May 17, 2006]

§4.31 Zero percent evaluations.

In every instance where the schedule does not provide a zero percent evaluation for a diagnostic code, a zero percent evaluation shall be assigned when the requirements for a compensable evaluation are not met.

[58 FR 52018, Oct. 6, 1993]

Subpart B—Disability Ratings

THE MUSCULOSKELETAL SYSTEM

$\S 4.40$ Functional loss.

Disability of the musculoskeletal system is primarily the inability, due

to damage or infection in parts of the system, to perform the normal working movements of the body with normal excursion, strength, speed, coordination and endurance. It is essential that the examination on which ratings are based adequately portray the anatomical damage, and the functional loss, with respect to all these elements. The functional loss may be due to absence of part, or all, of the necessary bones, joints and muscles, or associated structures, or to deformity, adhesions, defective innervation, or other pathology, or it may be due to pain, supported by adequate pathology and evidenced by the visible behavior of the claimant undertaking the motion. Weakness is as important as limitation of motion, and a part which becomes painful on use must be regarded as seriously disabled. A little used part of the musculoskeletal system may be expected to show evidence of disuse, either through atrophy, the condition of the skin, absence of normal callosity or the like.

§ 4.41 History of injury.

In considering the residuals of injury, it is essential to trace the medical-industrial history of the disabled person from the original injury, considering the nature of the injury and the attendant circumstances, and the requirements for, and the effect of, treatment over past periods, and the course of the recovery to date. The duration of the initial, and any subsequent, period of total incapacity, especially periods reflecting delayed union, inflammation, swelling, drainage, or operative intervention, should be given close attention. This consideration, or the absence of clear cut evidence of injury, may result in classifying the disability as not of traumatic origin, either reflecting congenital or developmental etiology, or the effects of healed dis-

§ 4.42 Complete medical examination of injury cases.

The importance of complete medical examination of injury cases at the time of first medical examination by the Department of Veterans Affairs cannot be overemphasized. When possible, this should include complete neurological

and psychiatric examination, and other special examinations indicated by the physical condition, in addition to the required general and orthopedic or surgical examinations. When complete examinations are not conducted covering all systems of the body affected by disease or injury, it is impossible to visualize the nature and extent of the service connected disability. Incomplete examination is a common cause of incorrect diagnosis, especially in the neurological and psychiatric fields, and frequently leaves the Department of Veterans Affairs in doubt as to the presence or absence of disabling conditions at the time of the examination.

§ 4.43 Osteomyelitis.

Chronic, or recurring, suppurative osteomyelitis, once clinically identified, including chronic inflammation of bone marrow, cortex, or periosteum, should be considered as a continuously disabling process, whether or not an actively discharging sinus or other obvious evidence of infection is manifest from time to time, and unless the focus is entirely removed by amputation will entitle to a permanent rating to be combined with other ratings for residual conditions, however, not exceeding amputation ratings at the site of election.

§ 4.44 The bones.

The osseous abnormalities incident to trauma or disease, such as malunion with deformity throwing abnormal stress upon, and causing malalignment of joint surfaces, should be depicted from study and observation of all available data, beginning with inception of injury or disease, its nature, degree of prostration, treatment and duration of convalescence, and progress of recovery with development of permanent residuals. With shortening of a long bone, some degree of angulation is to be expected; the extent and direction should be brought out by X-ray and observation. The direction of angulation and extent of deformity should be carefully related to strain on the neighboring joints, especially those connected with weight-bearing.

§ 4.45 The joints.

As regards the joints the factors of disability reside in reductions of their normal excursion of movements in different planes. Inquiry will be directed to these considerations:

- (a) Less movement than normal (due to ankylosis, limitation or blocking, adhesions, tendon-tie-up, contracted scars, etc.).
- (b) More movement than normal (from flail joint, resections, nonunion of fracture, relaxation of ligaments, etc.).
- (c) Weakened movement (due to muscle injury, disease or injury of peripheral nerves, divided or lengthened tendons, etc.).
 - (d) Excess fatigability.
- (e) Incoordination, impaired ability to execute skilled movements smoothly.
- (f) Pain on movement, swelling, deformity or atrophy of disuse. Instability of station, disturbance of locomotion, interference with standing and weight-bearing are related considerations. For the purpose of rating disability from arthritis, the shoulder, elbow, wrist, hip, knee, and ankle are considered major joints; multiple involvements of the interphalangeal, metacarpal and carpal joints of the upper extremities, the interphalangeal, metatarsal and tarsal joints of the lower extremities, the cervical vertebrae, the dorsal vertebrae, and the vertebrae, lumbar areconsidered groups of minor joints, ratable on a parity with major joints. lumbosacral articulation and both sacroiliac joints are considered to be a group of minor joints, ratable on disturbance of lumbar spine functions.

§ 4.46 Accurate measurement.

Accurate measurement of the length of stumps, excursion of joints, dimensions and location of scars with respect to landmarks, should be insisted on. The use of a goniometer in the measurement of limitation of motion is indispensable in examinations conducted within the Department of Veterans Affairs. Muscle atrophy must also be accurately measured and reported.

[41 FR 11294, Mar. 18, 1976]

§§ 4.47-4.54 [Reserved]

§ 4.55 Principles of combined ratings for muscle injuries.

- (a) A muscle injury rating will not be combined with a peripheral nerve paralysis rating of the same body part, unless the injuries affect entirely different functions.
- (b) For rating purposes, the skeletal muscles of the body are divided into 23 muscle groups in 5 anatomical regions: 6 muscle groups for the shoulder girdle and arm (diagnostic codes 5301 through 5306); 3 muscle groups for the forearm and hand (diagnostic codes 5307 through 5309); 3 muscle groups for the foot and leg (diagnostic codes 5310 through 5312); 6 muscle groups for the pelvic girdle and thigh (diagnostic codes 5313 through 5318); and 5 muscle groups for the torso and neck (diagnostic codes 5319 through 5323).
- (c) There will be no rating assigned for muscle groups which act upon an ankylosed joint, with the following exceptions:
- (1) In the case of an ankylosed knee, if muscle group XIII is disabled, it will be rated, but at the next lower level than that which would otherwise be assigned.
- (2) In the case of an ankylosed shoulder, if muscle groups I and II are severely disabled, the evaluation of the shoulder joint under diagnostic code 5200 will be elevated to the level for unfavorable ankylosis, if not already assigned, but the muscle groups themselves will not be rated.
- (d) The combined evaluation of muscle groups acting upon a single unankylosed joint must be lower than the evaluation for unfavorable ankylosis of that joint, except in the case of muscle groups I and II acting upon the shoulder.
- (e) For compensable muscle group injuries which are in the same anatomical region but do not act on the same joint, the evaluation for the most severely injured muscle group will be increased by one level and used as the combined evaluation for the affected muscle groups.
- (f) For muscle group injuries in different anatomical regions which do not act upon ankylosed joints, each muscle group injury shall be separately rated

and the ratings combined under the provisions of § 4.25.

(Authority: 38 U.S.C. 1155) [62 FR 30237, June 3, 1997]

§ 4.56 Evaluation of muscle disabilities.

- (a) An open comminuted fracture with muscle or tendon damage will be rated as a severe injury of the muscle group involved unless, for locations such as in the wrist or over the tibia, evidence establishes that the muscle damage is minimal.
- (b) A through-and-through injury with muscle damage shall be evaluated as no less than a moderate injury for each group of muscles damaged.
- (c) For VA rating purposes, the cardinal signs and symptoms of muscle disability are loss of power, weakness, lowered threshold of fatigue, fatigue-pain, impairment of coordination and uncertainty of movement.
- (d) Under diagnostic codes 5301 through 5323, disabilities resulting from muscle injuries shall be classified as slight, moderate, moderately severe or severe as follows:
- (1) Slight disability of muscles—(i) Type of injury. Simple wound of muscle without debridement or infection.
- (ii) History and complaint. Service department record of superficial wound with brief treatment and return to duty. Healing with good functional results. No cardinal signs or symptoms of muscle disability as defined in paragraph (c) of this section.
- (iii) Objective findings. Minimal scar. No evidence of fascial defect, atrophy, or impaired tonus. No impairment of function or metallic fragments retained in muscle tissue.
- (2) Moderate disability of muscles—(i) Type of injury. Through and through or deep penetrating wound of short track from a single bullet, small shell or shrapnel fragment, without explosive effect of high velocity missile, residuals of debridement, or prolonged infection
- (ii) History and complaint. Service department record or other evidence of in-service treatment for the wound. Record of consistent complaint of one or more of the cardinal signs and symptoms of muscle disability as defined in

- paragraph (c) of this section, particularly lowered threshold of fatigue after average use, affecting the particular functions controlled by the injured muscles.
- (iii) Objective findings. Entrance and (if present) exit scars, small or linear, indicating short track of missile through muscle tissue. Some loss of deep fascia or muscle substance or impairment of muscle tonus and loss of power or lowered threshold of fatigue when compared to the sound side.
- (3) Moderately severe disability of muscles—(i) Type of injury. Through and through or deep penetrating wound by small high velocity missile or large low-velocity missile, with debridement, prolonged infection, or sloughing of soft parts, and intermuscular scarring.
- (ii) History and complaint. Service department record or other evidence showing hospitalization for a prolonged period for treatment of wound. Record of consistent complaint of cardinal signs and symptoms of muscle disability as defined in paragraph (c) of this section and, if present, evidence of inability to keep up with work requirements
- (iii) Objective findings. Entrance and (if present) exit scars indicating track of missile through one or more muscle groups. Indications on palpation of loss of deep fascia, muscle substance, or normal firm resistance of muscles compared with sound side. Tests of strength and endurance compared with sound side demonstrate positive evidence of impairment.
- (4) Severe disability of muscles—(i) Type of injury. Through and through or deep penetrating wound due to high-velocity missile, or large or multiple low velocity missiles, or with shattering bone fracture or open comminuted fracture with extensive debridement, prolonged infection, or sloughing of soft parts, intermuscular binding and scarring.
- (ii) History and complaint. Service department record or other evidence showing hospitalization for a prolonged period for treatment of wound. Record of consistent complaint of cardinal signs and symptoms of muscle disability as defined in paragraph (c) of this section, worse than those shown for moderately severe muscle injuries,

and, if present, evidence of inability to keep up with work requirements.

- (iii) Objective findings. Ragged, depressed and adherent scars indicating wide damage to muscle groups in missile track. Palpation shows loss of deep fascia or muscle substance, or soft flabby muscles in wound area. Muscles swell and harden abnormally in contraction. Tests of strength, endurance, or coordinated movements compared with the corresponding muscles of the uninjured side indicate severe impairment of function. If present, the following are also signs of severe muscle disability:
- (A) X-ray evidence of minute multiple scattered foreign bodies indicating intermuscular trauma and explosive effect of the missile.
- (B) Adhesion of scar to one of the long bones, scapula, pelvic bones, sacrum or vertebrae, with epithelial sealing over the bone rather than true skin covering in an area where bone is normally protected by muscle.
- (C) Diminished muscle excitability to pulsed electrical current in electrodiagnostic tests.
 - (D) Visible or measurable atrophy.
- (E) Adaptive contraction of an opposing group of muscles.
- (F) Atrophy of muscle groups not in the track of the missile, particularly of the trapezius and serratus in wounds of the shoulder girdle.
- (G) Induration or atrophy of an entire muscle following simple piercing by a projectile.

(Authority: 38 U.S.C. 1155 [62 FR 30238, June 3, 1997]

§ 4.57 Static foot deformities.

It is essential to make an initial distinction between bilateral flatfoot as a congenital or as an acquired condition. The congenital condition, with depression of the arch, but no evidence of abnormal callosities, areas of pressure, strain or demonstrable tenderness, is a congenital abnormality which is not compensable or pensionable. In the acquired condition, it is to be remembered that depression of the longitudinal arch, or the degree of depression is not the essential feature. The attention should be given to anatomical changes, as compared to normal, in the

relationship of the foot and leg, particularly to the inward rotation of the superior portion of the os calcis, medial deviation of the insertion of the Achilles tendon, the medial tilting of the upper border of the astragalus. This is an unfavorable mechanical relationship of the parts. A plumb line dropped from the middle of the patella falls inside of the normal point. The forepart of the foot is abducted, and the foot everted. The plantar surface of the foot is painful and shows demonstrable tenderness, and manipulation of the foot produces spasm of the Achilles tendon, peroneal spasm due to adhesion about the peroneal sheaths, and other evidence of pain and limited motion. The symptoms should be apparent without regard to exercise. In severe cases there is gaping of bones on the inner border of the foot, and rigid valgus position with loss of the power of inversion and adduction. Exercise with undeveloped or unbalanced musculature, producing chronic irritation, can be an aggravating factor. In the absence of trauma or other definite evidence of aggravation, service connection is not in order for pes cavus which is a typically congenital or juvenile disease.

§ 4.58 Arthritis due to strain.

With service incurred lower extremity amputation or shortening, a disabling arthritis, developing in the same extremity, or in both lower extremities, with indications of earlier, or more severe, arthritis in the injured extremity, including also arthritis of the lumbosacral joints and lumbar spine, if associated with the leg amputation or shortening, will be considered as service incurred, provided, however, that arthritis affecting joints not directly subject to strain as a result of the service incurred amputation will not be granted service connection. This will generally require separate evaluation of the arthritis in the joints directly subject to strain. Amputation, or injury to an upper extremity, is not considered as a causative factor with subsequently developing arthritis, except in joints subject to direct strain or actually injured.

§4.59 Painful motion.

With any form of arthritis, painful motion is an important factor of disability, the facial expression, wincing, etc., on pressure or manipulation, should be carefully noted and definitely related to affected joints. Muscle spasm will greatly assist the identification. Sciatic neuritis is not uncommonly caused by arthritis of the spine. The intent of the schedule is to recognize painful motion with joint or periarticular pathology as productive of disability. It is the intention to recognize actually painful, unstable, or malaligned joints, due to healed injury, as entitled to at least the minimum compensable rating for the joint. Crepitation either in the soft tissues such as the tendons or ligaments, or crepitation within the joint structures should be noted carefully as points of contact which are diseased. Flexion elicits such manifestations. The joints involved should be tested for pain on both active and passive motion, in weight-bearing and nonweight-bearing and, if possible, with the range of the opposite undamaged joint.

§4.60 [Reserved]

§4.61 Examination.

With any form of arthritis (except traumatic arthritis) it is essential that the examination for rating purposes cover all major joints, with especial reference to Heberden's or Haygarth's nodes.

§ 4.62 Circulatory disturbances.

The circulatory disturbances, especially of the lower extremity following injury in the popliteal space, must not be overlooked, and require rating generally as phlebitis.

§4.63 Loss of use of hand or foot.

Loss of use of a hand or a foot, for the purpose of special monthly compensation, will be held to exist when no effective function remains other than that which would be equally well served by an amputation stump at the site of election below elbow or knee with use of a suitable prosthetic appliance. The determination will be made on the basis of the actual remaining function of the hand or foot, whether the acts of grasping, manipulation, etc., in the case of the hand, or of balance and propulsion, etc., in the case of the foot, could be accomplished equally well by an amputation stump with prosthesis.

- (a) Extremely unfavorable complete ankylosis of the knee, or complete ankylosis of 2 major joints of an extremity, or shortening of the lower extremity of $3\frac{1}{2}$ inches (8.9 cms.) or more, will be taken as loss of use of the hand or foot involved.
- (b) Complete paralysis of the external popliteal nerve (common peroneal) and consequent, footdrop, accompanied by characteristic organic changes including trophic and circulatory disturbances and other concomitants confirmatory of complete paralysis of this nerve, will be taken as loss of use of the foot.

[29 FR 6718, May 22, 1964, as amended at 43 FR 45349, Oct. 2, 1978]

§4.64 Loss of use of both buttocks.

Loss of use of both buttocks shall be deemed to exist when there is severe damage to muscle Group XVII, bilateral (diagnostic code number 5317) and additional disability rendering it impossible for the disabled person, without assistance, to rise from a seated position and from a stooped position (fingers to toes position) and to maintain postural stability (the pelvis upon head of femur). The assistance may be rendered by the person's own hands or arms, and, in the matter of postural stability, by a special appliance.

§4.65 [Reserved]

§4.66 Sacroiliac joint.

The common cause of disability in this region is arthritis, to be identified in the usual manner. The lumbosacral and sacroiliac joints should be considered as one anatomical segment for rating purposes. X-ray changes from arthritis in this location are decrease or obliteration of the joint space, with the appearance of increased bone density of the sacrum and ilium and sharpening of the margins of the joint. Disability is manifest from erector spinae spasm (not accounted for by other pathology), tenderness on deep palpation and percussion over these joints, loss of

normal quickness of motion and resiliency, and postural defects often accompanied by limitation of flexion and extension of the hip. Traumatism is a rare cause of disability in this connection, except when superimposed upon congenital defect or upon an existent arthritis; to permit assumption of pure traumatic origin, objective evidence of damage to the joint, and history of trauma sufficiently severe to injure this extremely strong and practically immovable joint is required. There should be careful consideration of lumbosacral sprain, and the various symptoms of pain and paralysis attributable to disease affecting the lumbar vertebrae and the intervertebral disc.

§ 4.67 Pelvic bones.

The variability of residuals following these fractures necessitates rating on specific residuals, faulty posture, limitation of motion, muscle injury, painful motion of the lumbar spine, manifest by muscle spasm, mild to moderate sciatic neuritis, peripheral nerve injury, or limitation of hip motion.

§ 4.68 Amputation rule.

The combined rating for disabilities of an extremity shall not exceed the rating for the amputation at the elective level, were amputation to be performed. For example, the combined evaluations for disabilities below the knee shall not exceed the 40 percent evaluation, diagnostic code 5165. This 40 percent rating may be further combined with evaluation for disabilities above the knee but not to exceed the above the knee amputation elective level. Painful neuroma of a stump after amputation shall be assigned the evaluation for the elective site of reamputation.

§ 4.69 Dominant hand.

Handedness for the purpose of a dominant rating will be determined by the evidence of record, or by testing on VA

examination. Only one hand shall be considered dominant. The injured hand, or the most severely injured hand, of an ambidextrous individual will be considered the dominant hand for rating purposes.

(Authority: 38 U.S.C. 1155) [62 FR 30239, June 3, 1997]

§4.70 Inadequate examinations.

If the report of examination is inadequate as a basis for the required consideration of service connection and evaluation, the rating agency may request a supplementary report from the examiner giving further details as to the limitations of the disabled person's ordinary activity imposed by the disease, injury, or residual condition, the prognosis for return to, or continuance of, useful work. When the best interests of the service will be advanced by personal conference with the examiner, such conference may be arranged through channels.

§4.71 Measurement of ankylosis and joint motion.

Plates I and II provide a standardized description of ankylosis and joint motion measurement. The anatomical position is considered as 0°, with two major exceptions: (a) Shoulder rotation—arm abducted to 90°, elbow flexed to 90° with the position of the forearm reflecting the midpoint 0° between internal and external rotation of the shoulder; and (b) supination and pronation—the arm next to the body, elbow flexed to 90°, and the forearm in midposition 0° between supination and pronation. Motion of the thumb and fingers should be described by appropriate reference to the joints (See Plate III) whose movement is limited, with a statement as to how near, in centimeters, the tip of the thumb can approximate the fingers, or how near the tips of the fingers can approximate the proximal transverse crease of palm.

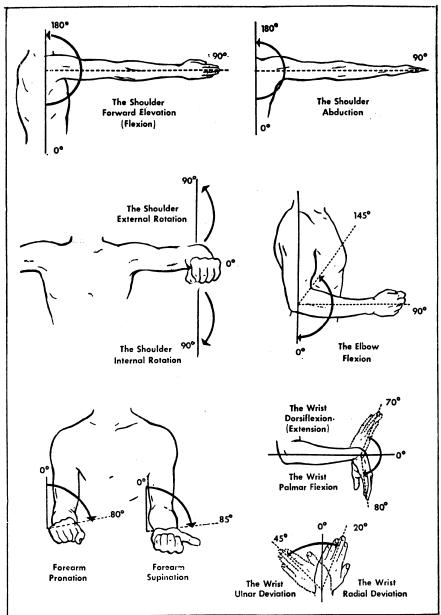

PLATE I

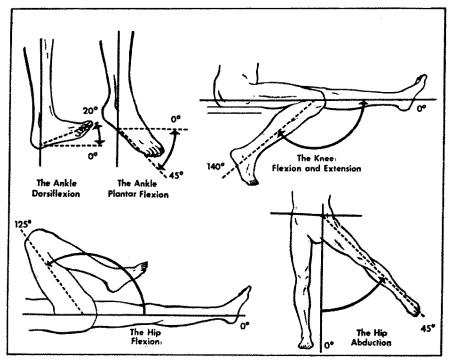

PLATE II

[29 FR 6718, May 22, 1964, as amended at 43 FR 45349, Oct. 2, 1978; 67 FR 48785, July 26, 2002]

\$4.71a Schedule of ratings—musculo-skeletal system.

ACUTE, SUBACUTE, OR CHRONIC DISEASES

	Rat- ing

amyloid liver changes, or other continuous	
constitutional symptoms	100
Frequent episodes, with constitutional symptoms	60
With definite involucrum or sequestrum, with or without discharging sinus	30
tive infection within the past 5 years	20
evidence of active infection in past 5 years	10

ACUTE, SUBACUTE, OR CHRONIC DISEASES—Continued

Rat-

	ing
Note (1): A rating of 10 percent, as an exception to the amputation rule, is to be assigned in any case of active osteomyelitis where the amputation rating for the affected part is no percent. This 10 percent rating and the other partial ratings of 30 percent or less are to be combined with ratings for ankylosis, limited motion, nonunion or malunion, shortening, etc., subject, of course, to the amputation rule. The 60 percent rating, as it is based on constitutional symptoms, is not subject to the amputation rule. A rating for osteomyelitis will not be applied following cure by removal or radical resection of the affected bone.	

§4.71a

38 CFR Ch. I (7-1-15 Edition)

ACUTE, SUBACUTE, OR CHRONIC DISEASES—Continued

ACUTE, SUBACUTE, OR CHRONIC DISEASE Continued		ACUTE, SUBACUTE, OR CHRONIC DISEASE Continued	.5
	Rat- ing		Rat- ing
NOTE (2): The 20 percent rating on the basis of activity within the past 5 years is not assignable following the initial infection of active osteomyelitis with no subsequent reactivation. The prerequisite for this historical rating is an established recurrent osteomyelitis. To qualify for the 10 percent rating, 2 or more episodes following the initial infection are required. This 20 percent rating or the 10 percent rating, when applicable, will be assigned once only to cover disability at all sites of previously active infection with a future ending date in the case of the 20 percent rating. 5001 Bones and joints, tuberculosis of, active or inactive: Active	100	With X-ray evidence of involvement of 2 or more major joints or 2 or more minor joint groups, with occasional incapacitating exacerbations	20
5002 Arthritis rheumatoid (atrophic) As an active process: With constitutional manifestations associated with active joint involvement, totally incapacitating Less than criteria for 100% but with weight loss and anemia productive of severe impairment of health or severely incapacitating exacerbations occurring 4 or more times a year or a lesser number over prolonged periods Symptom combinations productive of definite impairment of health objectively supported by examination findings or incapacitating exacerbations occurring 3 or more times a year One or two exacerbations a year in a well-estab-	100 60 40 20	5007 Arthritis, syphilitic. 5008 Arthritis, streptococcic. 5009 Arthritis, other types (specify). With the types of arthritis, diagnostic codes 5004 through 5009, rate the disability as rheumatoid arthritis. 5010 Arthritis, due to trauma, substantiated by X-ray findings: Rate as arthritis, degenerative. 5011 Bones, caisson disease of: Rate as arthritis, cord involvement, or deafness, depending on the severity of disabiling manifestations. 5012 Bones, new growths of, malignant NOTE: The 100 percent rating will be continued for 1 year following the cessation of surgical, X-ray, antineoplastic chemotherapy or other	100
lished diagnosis	20	therapeutic procedure. At this point, if there has been no local recurrence or metastases, the rating will be made on residuals. 5013 Osteoporosis, with joint manifestations. 5014 Osteomalacia. 5015 Bones, new growths of, benign. 5016 Osteitis deformans. 5017 Gout. 5018 Hydrarthrosis, intermittent. 5019 Bursitis. 5020 Synovitis. 5021 Myositis. 5022 Periostitis. 5023 Myositis ossificans. 5024 Tenosynovitis. The diseases under diagnostic codes 5013 through 5024 will be rated on limitation of motion of affected parts, as arthritis, degenerative, except gout which will be rated under diagnostic code 5002. 5025 Fibromyalgia (fibrositis, primary fibromyalgia syndrome)	
motion under the appropriate diagnostic codes for the specific joint or joints involved (DC 5200 etc.). When however, the limitation of motion of the specific joint or joints involved is noncompensable under the appropriate diagnostic codes, a rating of 10 pct is for application for each such major joint or group of minor joints affected by limitation of motion, to be combined, not added under diagnostic code 5003. Limitation of motion must be objectively confirmed by findings such as swelling, muscle spasm, or satisfactory evidence of painful motion. In the absence of limitation of		With widespread musculoskeletal pain and tender points, with or without associated fatigue, sleep disturbance, stiffness, paresthesias, headache, irritable bowel symptoms, depression, anxiety, or Raynaud's-like symptoms: That are constant, or nearly so, and refractory to therapy That are episodic, with exacerbations often precipitated by environmental or emotional stress or by overexertion, but that are present more than one-third of the time That require continuous medication for contractions without page 12.	40

50° or with complete loss of		
supination or pronation	60	50
Intermediate, at an angle of more than		
90°, or between 70° and 50°	50	40
Favorable, at an angle between 90° and		
70°	40	30
5206 Forearm, limitation of flexion of:		
Flexion limited to 45°	50	40
Flexion limited to 55°	40	30
Flexion limited to 70°	30	20
Flexion limited to 90°	20	20
Flexion limited to 100°	10	10
Flexion limited to 110°	0	0
5207 Forearm, limitation of extension of:		
Extension limited to 110°	50	40
Extension limited to 100°	40	30
Extension limited to 90°	30	20
Extension limited to 75°	20	20
Extension limited to 60°	10	10
Extension limited to 45°	10	10
5208 Forearm, flexion limited to 100° and		
extension to 45°	20	20
5209 Elbow, other impairment of Flail joint	60	50

THE ELBOW AND FOREARM—Continued

Joint fracture, with marked cubitus varus or cubitus valgus deformity or with ununited fracture of head of radius	20 40
varus or cubitus valgus deformity or with ununited fracture of head of radius	
5210 Radius and ulna, nonunion of, with	
flail false joint 50	-10
5211 Ulna, impairment of:	
Nonunion in upper half, with false movement:	
With loss of bone substance (1 inch (2.5 cms.) or more) and marked	
deformity	30
deformity 30	20
Nonunion in lower half 20	20
Malunion of, with bad alignment 10 5212 Radius, impairment of:	10
Nonunion in lower half, with false movement:	
With loss of bone substance (1 inch	
(2.5 cms.) or more) and marked	
deformity 40	30
Without loss of bone substance or	
deformity	20
Nonunion in upper half	20
Malunion of, with bad alignment 10 5213 Supination and propation, impairment	10
5213 Supination and pronation, impairment of:	
Loss of (bone fusion):	
The hand fixed in supination or	
hyperpronation	30
The hand fixed in full pronation 30	20
The hand fixed near the middle of	
the arc or moderate pronation 20	20
Limitation of pronation:	
Motion lost beyond middle of arc 30	20
Motion lost beyond last quarter of	
arc, the hand does not approach	
full pronation	20
Limitation of supination:	
To 30° or less	10
NOTE: In all the forearm and wrist injuries, codes 5205 through 5213, mul-	
tiple impaired finger movements due	
to tendon tie-up, muscle or nerve in-	
jury, are to be separately rated and	
combined not to exceed rating for	
loss of use of hand.	

THE WRIST

	Rating	
	Major	Minor
5214 Wrist, ankylosis of: Unfavorable, in any degree of palmar flexion, or with ulnar or radial deviation Any other position, except favorable Favorable in 20° to 30° dorsiflexion NOTE: Extremely unfavorable ankylosis will be rated as loss of use of hands under diagnostic code 5125.	50 40 30	40 30 20
5215 Wrist, limitation of motion of: Dorsiflexion less than 15°	10	10
arm	10	10

MISCELLANEOUS

	Rat- ing

5324 Diaphragm, rupture of, with herniation. Rate under diagnostic code 7346.

5325 Muscle injury, facial muscles. Evaluate functional impairment as seventh (facial) cranial nerve neuropathy (diagnostic code 8207), disfiguring scar (diagnostic code 7800), etc. Minimum, if interfering to any extent with mastication—10.

5326 Muscle hernia, extensive. Without other injury to the muscle—10.

5327 Muscle, neoplasm of, malignant (excluding soft tissue sarcoma)—100.

NOTE: A rating of 100 percent shall continue beyond the cessation of any surgery, radiation treatment, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residual impairment of function.

5328 Muscle, neoplasm of, benign, postoperative. Rate on impairment of function, i.e., limitation of motion, or scars, diagnostic code 7805, etc.

5329 Sarcoma, soft tissue (of muscle, fat, or fibrous connective tissue)—100.

NOTE: A rating of 100 percent shall continue beyond the cessation of any surgery, radiation treatment, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residual impairment of function.

(Authority: 38 U.S.C. 1155) [62 FR 30239, June 3, 1997]

THE ORGANS OF SPECIAL SENSE

§ 4.75 General considerations for evaluating visual impairment.

(a) Visual impairment. The evaluation of visual impairment is based on impairment of visual acuity (excluding developmental errors of refraction), visual field, and muscle function.

- (b) Examination for visual impairment. The examination must be conducted by a licensed optometrist or by a licensed ophthalmologist. The examiner must identify the disease, injury, or other pathologic process responsible for any visual impairment found. Examinations of visual fields or muscle function will be conducted only when there is a medical indication of disease or injury that may be associated with visual field defect or impaired muscle function. Unless medically contraindicated, the fundus must be examined with the claimant's pupils dilated.
- (c) Service-connected visual impairment of only one eye. Subject to the provisions of 38 CFR 3.383(a), if visual impairment of only one eye is service-connected, the visual acuity of the other eye will be considered to be 20/40 for purposes of evaluating the service-connected visual impairment.
- (d) Maximum evaluation for visual impairment of one eye. The evaluation for visual impairment of one eye must not exceed 30 percent unless there is anatomical loss of the eye. Combine the evaluation for visual impairment of one eye with evaluations for other disabilities of the same eye that are not based on visual impairment (e.g., disfigurement under diagnostic code 7800).
- (e) Anatomical loss of one eye with inability to wear a prosthesis. When the claimant has anatomical loss of one eye and is unable to wear a prosthesis, increase the evaluation for visual acuity under diagnostic code 6063 by 10 percent, but the maximum evaluation for visual impairment of both eyes must not exceed 100 percent. A 10-percent increase under this paragraph precludes an evaluation under diagnostic code 7800 based on gross distortion or asymmetry of the eye but not an evaluation under diagnostic code 7800 based on other characteristics of disfigurement.
- (f) Special monthly compensation. When evaluating visual impairment, refer to 38 CFR 3.350 to determine whether the claimant may be entitled to special monthly compensation. Footnotes in the schedule indicate levels of visual impairment that potentially establish entitlement to special monthly compensation; however, other levels of visual impairment combined

with disabilities of other body systems may also establish entitlement.

(Authority: 38 U.S.C. 1114 and 1155) [73 FR 66549, Nov. 10, 2008]

§4.76 Visual acuity.

- (a) Examination of visual acuity. Examination of visual acuity must include the central uncorrected and corrected visual acuity for distance and near vision using Snellen's test type or its equivalent.
- (b) Evaluation of visual acuity. (1) Evaluate central visual acuity on the basis of corrected distance vision with central fixation, even if a central scotoma is present. However, when the lens required to correct distance vision in the poorer eye differs by more than three diopters from the lens required to correct distance vision in the better eye (and the difference is not due to congenital or developmental refractive error), and either the poorer eye or both eyes are service connected, evaluate the visual acuity of the poorer eye using either its uncorrected or corrected visual acuity, whichever results in better combined visual acuity.
- (2) Provided that he or she customarily wears contact lenses, evaluate the visual acuity of any individual affected by a corneal disorder that results in severe irregular astigmatism that can be improved more by contact lenses than by eyeglass lenses, as corrected by contact lenses.

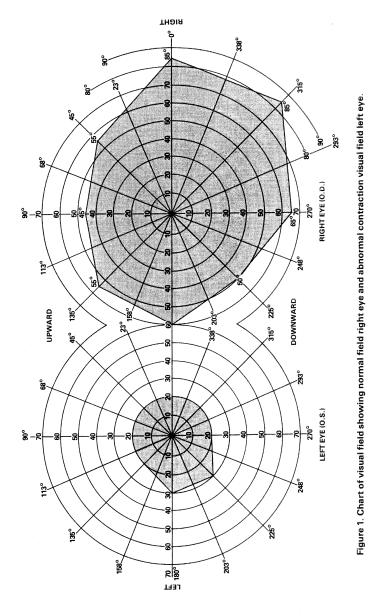

- (3) In any case where the examiner reports that there is a difference equal to two or more scheduled steps between near and distance corrected vision, with the near vision being worse, the examination report must include at least two recordings of near and distance corrected vision and an explanation of the reason for the difference. In these cases, evaluate based on corrected distance vision adjusted to one step poorer than measured.
- (4) To evaluate the impairment of visual acuity where a claimant has a reported visual acuity that is between two sequentially listed visual acuities, use the visual acuity which permits the higher evaluation.

(Authority: 38 U.S.C. 1155) [73 FR 66549, Nov. 10, 2008]

§ 4.76a Computation of average concentric contraction of visual fields.

 $[43\ \mathrm{FR}\ 45352,\ \mathrm{Oct.}\ 2,\ 1978,\ \mathrm{as}\ \mathrm{amended}\ \mathrm{at}\ 73\ \mathrm{FR}\ 66549,\ \mathrm{Nov.}\ 10,\ 2008]$

§ 4.77 Visual fields.

(a) Examination of visual fields. Examiners must use either Goldmann kinetic perimetry or automated perimetry using Humphrey Model 750, Octopus Model 101, or later versions of these perimetric devices with simulated kinetic Goldmann testing capability. For phakic (normal) individuals, as well as for pseudophakic or aphakic individuals who are well adapted to intraocular lens implant or contact lens correction, visual field examinations must be conducted using a standard target size and luminance, Goldmann's equivalent which III/4e. For aphakic individuals not well adapted to correction contact lens orpseudophakic individuals not adapted to intraocular lens implant. visual field examinations must be conducted using Goldmann's equivalent IV/4e. In all cases, the results must be recorded on a standard Goldmann chart

(see Figure 2), and the Goldmann chart must be included with the examination report. The examiner must chart at least 16 meridians 22½ degrees apart for each eye and indicate the Goldmann equivalent used. See Table III for the normal extent (in degrees) of the visual fields at the 8 principal meridians (45 degrees apart). When the examiner indicates that additional testing is necessary to evaluate visual fields, the additional testing must be conducted using either a tangent screen or a 30-degree threshold visual field with the Goldmann III stimulus size. The examination report must then include the tracing of either the tangent screen or of the 30-degree threshold visual field with the Goldmann III stimulus size.

(b) Evaluation of visual fields. Determine the average concentric contraction of the visual field of each eye by measuring the remaining visual field (in degrees) at each of eight principal meridians 45 degrees apart, adding them, and dividing the sum by eight.

(c) Combination of visual field defect and decreased visual acuity. To determine the evaluation for visual impairment when both decreased visual acuity and visual field defect are present in one or both eyes and are service connected, separately evaluate the visual acuity and visual field defect (expressed as a level of visual acuity), and combine them under the provisions of § 4.25.

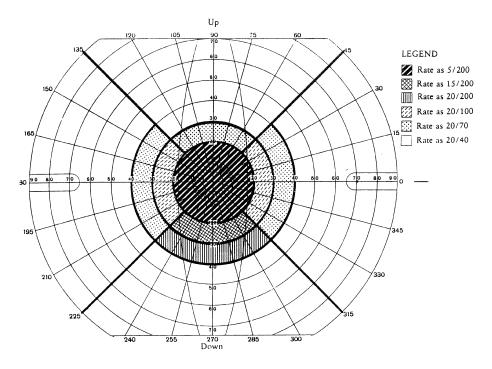

Figure 2. Goldmann Perimeter Chart

52c

(Authority: 38 U.S.C. 1155)

 $[53~\mathrm{FR}~30262,~\mathrm{Aug}.~11,~1988,~\mathrm{as~amended~at}~73~\mathrm{FR}~66549,~\mathrm{Nov}.~10,~2008;~74~\mathrm{FR}~7648,~\mathrm{Feb}.~19,~2009]$

§ 4.78 Muscle function.

(a) Examination of muscle function. The examiner must use a Goldmann perimeter chart that identifies the four major quadrants (upward, downward, left and right lateral) and the central field (20 degrees or less) (see Figure 2). The examiner must chart the areas of diplopia and include the plotted chart with the examination report.

(b) Evaluation of muscle function. (1) An evaluation for diplopia will be assigned to only one eye. When a claimant has both diplopia and decreased visual acuity or visual field defect, assign a level of corrected visual acuity

for the poorer eye (or the affected eye, if disability of only one eye is serviceconnected) that is: one step poorer than it would otherwise warrant if the evaluation for diplopia under diagnostic code 6090 is 20/70 or 20/100; two steps poorer if the evaluation under diagnostic code 6090 is 20/200 or 15/200; or three steps poorer if the evaluation under diagnostic code 6090 is 5/200. This adjusted level of corrected visual acuity, however, must not exceed a level of 5/200. Use the adjusted visual acuity for the poorer eye (or the affected eye, if disability of only one eye is serviceconnected), and the corrected visual

acuity for the better eye (or visual acuity of 20/40 for the other eye, if only one eye is service-connected) to determine the percentage evaluation for visual impairment under diagnostic codes 6065 through 6066.

(2) When diplopia extends beyond more than one quadrant or range of degrees, evaluate diplopia based on the quadrant and degree range that provides the highest evaluation.

(3) When diplopia exists in two separate areas of the same eye, increase the equivalent visual acuity under diagnostic code 6090 to the next poorer level of visual acuity, not to exceed 5/200

(Authority: 38 U.S.C. 1155) [73 FR 66550, Nov. 10, 2008]

$\S 4.79$ Schedule of ratings—eye.

DISEASES OF THE EYE

	BIOLINE OF THE LIE	
		Rating
	Choroidopathy, including uveitis, iritis, cyclitis, and choroiditis.	
	Keratopathy.	
	Scleritis.	
	Retinopathy or maculopathy. Intraocular hemorrhage.	
	Detachment of retina.	
	Unhealed eye injury.	
	General Rating Formula for Diagnostic Codes 6000 through 6009	
	Evaluate on the basis of either visual impairment due to the particular condition or on incapacitating epi-	
	sodes, whichever results in a higher evaluation.	
	With incapacitating episodes having a total duration of at least 6 weeks during the past 12 months	60
	With incapacitating episodes having a total duration of at least 4 weeks, but less than 6 weeks, during the	40
	past 12 months	40
	past 12 months	20
	With incapacitating episodes having a total duration of at least 1 week, but less than 2 weeks, during the past 12 months	10
	For VA purposes, an incapacitating episode is a period of acute symptoms severe enough to require pre-	
	ed bed rest and treatment by a physician or other healthcare provider.	
6010	Tuberculosis of eye:	400
	Active	100
6011	Retinal scars, atrophy, or irregularities:	
	Localized scars, atrophy, or irregularities of the retina, unilateral or bilateral, that are centrally located and that result in an irregular, duplicated, enlarged, or diminished image	10
	Alternatively, evaluate based on visual impairment due to retinal scars, atrophy, or irregularities, if this	
	would result in a higher evaluation.	
6012	Angle-closure glaucoma:	
	Evaluate on the basis of either visual impairment due to angle-closure glaucoma or incapacitating episodes, whichever results in a higher evaluation.	
	With incapacitating episodes having a total duration of at least 6 weeks during the past 12 months	60
	With incapacitating episodes having a total duration of at least 4 weeks, but less than 6 weeks, during the	00
	past 12 months	40
	With incapacitating episodes having a total duration of at least 2 weeks, but less than 4 weeks, during the	
	past 12 months	20
	Minimum evaluation if continuous medication is required	10
	For VA purposes, an incapacitating episode is a period of acute symptoms severe enough to require pre-	
	ed bed rest and treatment by a physician or other healthcare provider. Open-angle glaucoma:	
6013	Evaluate based on visual impairment due to open-angle glaucoma.	
	Minimum evaluation if continuous medication is required	10
6014	Malignant neoplasms (eyeball only):	
	Malignant neoplasm of the eyeball that requires therapy that is comparable to that used for systemic malig-	
	nancies, i.e., systemic chemotherapy, X-ray therapy more extensive than to the area of the eye, or sur-	
	gery more extensive than enucleation	100
	Continue the 100-percent rating beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or	
will b	r therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent nination will be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or	
meta	stasis, evaluate based on residuals. Malignant neoplasm of the eyeball that does not require therapy comparable to that for systemic malig-	
	nancies: Separately evaluate visual impairment and nonvisual impairment, e.g., disfigurement (diagnostic code	
6015	7800), and combine the evaluations. Benign neoplasms (of eyeball and adnexa):	

DISEASES OF THE EYE—Continued

		Rating
	Separately evaluate visual impairment and nonvisual impairment, e.g., disfigurement (diagnostic code 7800), and combine the evaluations.	
	Nystagmus, central	
017	Trachomatous conjunctivitis: Active: Evaluate based on visual impairment, minimum	
	Inactive: Evaluate based on residuals, such as visual impairment and disfigurement (diagnostic code 7800).	
018	Chronic conjunctivitis (nontrachomatous):	
	Active (with objective findings, such as red, thick conjunctivae, mucous secretion, etc.)	
019	Ptosis, unilateral or bilateral:	
	Evaluate based on visual impairment or, in the absence of visual impairment, on disfigurement (diagnostic	
220	code 7800). Ectropion:	
020	Bilateral	
	Unilateral	
021	Entropion: Bilateral	
	Unilateral	
022	Lagophthalmos:	
	Bilateral Unilateral	
023		
024	Loss of eyelashes, complete, unilateral or bilateral	
ງ25	Disorders of the lacrimal apparatus (epiphora, dacryocystitis, etc.): Bilateral	
	Unilateral	
026	Optic neuropathy:	
007	Evaluate based on visual impairment. Cataract of any type:	
	operative:	
	Evaluate based on visual impairment.	
Pos	stoperative:	
	If a replacement lens is present (pseudophakia), evaluate based on visual impairment. If there is no re- placement lens, evaluate based on aphakia.	
029	Aphakia or dislocation of crystalline lens:	
	Evaluate based on visual impairment, and elevate the resulting level of visual impairment one step.	
030	Minimum (unilateral or bilateral) Paralysis of accommodation (due to neuropathy of the Oculomotor Nerve (cranial nerve III)).	
	Loss of eyelids, partial or complete:	
	Separately evaluate both visual impairment due to eyelid loss and nonvisual impairment, e.g., disfigurement	
034	(diagnostic code 7800), and combine the evaluations. Pterygium:	
	Evaluate based on visual impairment, disfigurement (diagnostic code 7800), conjunctivitis (diagnostic code	
005	6018), etc., depending on the particular findings.	
035	Keratoconus: Evaluate based on impairment of visual acuity.	
036	Status post corneal transplant:	
	Evaluate based on visual impairment.	
037	Minimum, if there is pain, photophobia, and glare sensitivity	
	Evaluate based on disfigurement (diagnostic code 7800).

§§ 4.80-4.84 [Reserved]

IMPAIRMENT OF AUDITORY ACUITY

§4.85 Evaluation of hearing impairment.

(a) An examination for hearing impairment for VA purposes must be conducted by a state-licensed audiologist and must include a controlled speech discrimination test (Maryland CNC) and a puretone audiometry test. Ex-

aminations will be conducted without the use of hearing aids.

(b) Table VI, "Numeric Designation of Hearing Impairment Based on Puretone Threshold Average and Speech Discrimination," is used to determine a Roman numeral designation (I through XI) for hearing impairment based on a combination of the percent of speech discrimination (horizontal

rows) and the puretone threshold average (vertical columns). The Roman numeral designation is located at the point where the percentage of speech discrimination and puretone threshold average intersect.

(c) Table VIa, "Numeric Designation of Hearing Impairment Based Only on Puretone Threshold Average," is used to determine a Roman numeral designation (I through XI) for hearing impairment based only on the puretone threshold average. Table VIa will be used when the examiner certifies that use of the speech discrimination test is not appropriate because of language difficulties, inconsistent speech discrimination scores, etc., or when indicated under the provisions of §4.86.

(d) "Puretone threshold average," as used in Tables VI and VIa, is the sum of the puretone thresholds at 1000, 2000, 3000 and 4000 Hertz, divided by four. This average is used in all cases (including those in §4.86) to determine the Roman numeral designation for hearing impairment from Table VI or VIa.

(e) Table VII, "Percentage Evaluations for Hearing Impairment," is used to determine the percentage evaluation by combining the Roman numeral designations for hearing impairment of each ear. The horizontal rows represent the ear having the better hearing and the vertical columns the ear having the poorer hearing. The percentage evaluation is located at the point where the row and column intersect.

(f) If impaired hearing is service-connected in only one ear, in order to determine the percentage evaluation from Table VII, the non-service-connected ear will be assigned a Roman Numeral designation for hearing impairment of I, subject to the provisions of § 3.383 of this chapter.

(g) When evaluating any claim for impaired hearing, refer to \$3.350 of this chapter to determine whether the veteran may be entitled to special monthly compensation due either to deafness, or to deafness in combination with other specified disabilities.

(h) Numeric tables VI, VIA*, and VII.

§ 4.86 Exceptional patterns of hearing impairment.

(a) When the puretone threshold at each of the four specified frequencies (1000, 2000, 3000, and 4000 Hertz) is 55 decibels or more, the rating specialist will determine the Roman numeral designation for hearing impairment from either Table VI or Table VIa, whichever results in the higher nu-

meral. Each ear will be evaluated separately.

(b) When the puretone threshold is 30 decibels or less at 1000 Hertz, and 70 decibels or more at 2000 Hertz, the rating specialist will determine the Roman numeral designation for hearing impairment from either Table VI or Table VIa, whichever results in the higher numeral. That numeral will then be elevated to the next higher

§4.88a

Roman numeral. Each ear will be evaluated separately.

6200 Chronic suppurative otitis media, mastoiditis,
or cholesteatoma (or any combination):
During suppuration, or with aural polyps
NOTE: Evaluate hearing impairment, and com-
plications such as labyrinthitis, tinnitus, facial
nerve paralysis, or bone loss of skull, sepa-
rately.
6201 Chronic nonsuppurative otitis media with effu-
sion (serous otitis media):
Rate hearing impairment
6202 Otosclerosis:
Rate hearing impairment
6204 Peripheral vestibular disorders:
Dizziness and occasional staggering
Occasional dizziness
NOTE: Objective findings supporting the diag- nosis of vestibular disequilibrium are required
before a compensable evaluation can be as-
signed under this code. Hearing impairment or
suppuration shall be separately rated and
combined.
6205 Meniere's syndrome (endolymphatic hydrops):
Hearing impairment with attacks of vertigo and
cerebellar gait occurring more than once
weekly, with or without tinnitus
Hearing impairment with attacks of vertigo and
cerebellar gait occurring from one to four
times a month, with or without tinnitus
Hearing impairment with vertigo less than once a
month, with or without tinnitus
Note: Evaluate Meniere's syndrome either under
these criteria or by separately evaluating
vertigo (as a peripheral vestibular disorder),
hearing impairment, and tinnitus, whichever method results in a higher overall evaluation.
But do not combine an evaluation for hearing
impairment, tinnitus, or vertigo with an evalua-
tion under diagnostic code 6205. 6207 Loss of auricle:
Complete loss of both
Complete loss of one
Deformity of one, with loss of one-third or more
of the substance
6208 Malignant neoplasm of the ear (other than
skin only)
NOTE: A rating of 100 percent shall continue be-
yond the cessation of any surgical, radiation
treatment, antineoplastic chemotherapy or
other therapeutic procedure. Six months after
discontinuance of such treatment, the appro-
priate disability rating shall be determined by
mandatory VA examination. Any change in evaluation based on that or any subsequent
evaluation based on that or any subsequent
examination shall be subject to the provisions
of § 3.105(e) of this chapter. If there has been
no local recurrence or metastasis, rate on re-
siduals. 6209 Benign neoplasms of the ear (other than skin
only):
Rate on impairment of function.

§4.88c

§4.88c Ratings for inactive nonpulmonary tuberculosis initially entitled after August 19, 1968.

	Rat- ing
For 1 year after date of inactivity, following active tu- berculosis	100

Following the total rating for the 1 year period after date of inactivity, the schedular evaluation for residuals of nonpulmonary tuberculosis, i.e., ankylosis, surgical removal of a part, etc., will be assigned under the appropriate diagnostic code for the residual preceded by the diagnostic code for tuberculosis of the body part affected. For example, tuberculosis of the hip joint with residual ankylosis would be coded 5001–5250. Where there are existing residuals of pulmonary and nonpulmonary conditions, the evaluations for residual separate functional impairment may be combined.

Where there are existing pulmonary and nonpulmonary conditions, the total rating for the 1 year, after attainment of inactivity, may not be applied to both conditions during the same period. However, the total rating during the 1-year period for the pulmonary or for the nonpulmonary condition will be utilized, combined with evaluation for residuals of the condition not covered by the 1-year total evaluation, so as to allow any additional benefit provided during such period.

[34 FR 5062, Mar. 11, 1969. Redesignated at 59 FR 60902, Nov. 29, 1994]

§ 4.89 Ratings for inactive nonpulmonary tuberculosis in effect on August 19, 1968.

Public Law 90-493 repealed section 356 of title 38, United States Code which provided graduated ratings for inactive tuberculosis. The repealed section, however, still applies to the case of any veteran who on August 19, 1968, was receiving or entitled to receive compensation for tuberculosis. The use of the protective provisions of Pub. L. 90-493 should be mentioned in the discussion portion of all ratings in which these provisions are applied. For use in rating cases in which the protective provisions of Pub. L. 90-493 apply, the former evaluations are retained in this section.

	Rat- ing
For 2 years after date of inactivity, following active tuberculosis, which was clinically identified during	
service or subsequently	100
Thereafter, for 4 years, or in any event, to 6 years after date of inactivity	50
Thereafter, for 5 years, or to 11 years after date of inactivity	30
Thereafter, in the absence of a schedular compen-	
sable permanent residual	l o

Following the total rating for the 2-year period after date of inactivity, the schedular evaluation for residuals of nonpulmonary tuberculosis, *i.e.*, ankylosis, surgical removal of a part, etc., if in excess of 50 percent or 30 percent will be assigned under the appropriate diagnostic code for the specific residual preceded by the diagnostic code for tuberculosis of the body part affected. For example, tuberculosis of the hipjoint with residual ankylosis would be coded 5001–5250.

The graduated ratings for nonpulmonary tuberculosis will not be combined with residuals of nonpulmonary tuberculosis unless the graduated rating and the rating for residual disability cover separate functional losses, e.g., graduated ratings for tuberculosis of the kidney and residuals of tuberculosis of the spine. Where there are existing pulmonary and nonpulmonary conditions, the graduated evaluation for the pulmonary, or for the nonpulmonary, condition will be utilized, combined with evaluations for residuals of the condition not covered by the graduated evaluation utilized, so as to provide the higher evaluation over such period.

The ending dates of all graduated ratings of nonpulmonary tuberculosis will be controlled by the date of attainment of inactivity.

These ratings are applicable only to veterans with nonpulmonary tuberculosis active on or after October 10, 1949.

[29 FR 6718, May 22, 1964, as amended at 34 FR 5062, Mar. 11, 1969; 43 FR 45361, Oct. 2, 1978]

THE RESPIRATORY SYSTEM

§ 4.96 Special provisions regarding evaluation of respiratory conditions.

(a) Rating coexisting respiratory conditions. Ratings under diagnostic codes 6600 through 6817 and 6822 through 6847 will not be combined with each other. Where there is lung or pleural involvement, ratings under diagnostic codes 6819 and 6820 will not be combined with each other or with diagnostic codes 6600 through 6817 or 6822 through 6847. A single rating will be assigned under the diagnostic code which reflects the predominant disability with elevation to the next higher evaluation where the severity of the overall disability warrants such elevation. However, in cases protected by the provisions of Pub. L. 90-493, the graduated ratings of 50 and 30 percent for inactive tuberculosis will not be elevated.

(b) Rating "protected" tuberculosis cases. Public Law 90-493 repealed section 356 of title 38, United States Code which had provided graduated ratings for inactive tuberculosis. The repealed

section, however, still applies to the case of any veteran who on August 19, 1968, was receiving or entitled to receive compensation for tuberculosis. The use of the protective provisions of Pub. L. 90–493 should be mentioned in the discussion portion of all ratings in which these provisions are applied. For application in rating cases in which the protective provisions of Pub. L. 90–493 apply the former evaluations pertaining to pulmonary tuberculosis are retained in §4.97.

- (c) Special monthly compensation. When evaluating any claim involving complete organic aphonia, refer to §3.350 of this chapter to determine whether the veteran may be entitled to special monthly compensation. Footnotes in the schedule indicate conditions which potentially establish entitlement to special monthly compensation; however, there are other conditions in this section which under certain circumstances also establish entitlement to special monthly compensation.
- (d) Special provisions for the application of evaluation criteria for diagnostic codes 6600, 6603, 6604, 6825–6833, and 6840–6845. (1) Pulmonary function tests (PFT's) are required to evaluate these conditions except:
- (i) When the results of a maximum exercise capacity test are of record and are 20 ml/kg/min or less. If a maximum exercise capacity test is not of record, evaluate based on alternative criteria.
- (ii) When pulmonary hypertension (documented by an echocardiogram or cardiac catheterization), cor pulmonale, or right ventricular hypertrophy has been diagnosed.
- (iii) When there have been one or more episodes of acute respiratory failure.
- (iv) When outpatient oxygen therapy is required.

- (2) If the DLCO (SB) (Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method) test is not of record, evaluate based on alternative criteria as long as the examiner states why the test would not be useful or valid in a particular case.
- (3) When the PFT's are not consistent with clinical findings, evaluate based on the PFT's unless the examiner states why they are not a valid indication of respiratory functional impairment in a particular case.
- (4) Post-bronchodilator studies are required when PFT's are done for disability evaluation purposes except when the results of pre-bronchodilator pulmonary function tests are normal or when the examiner determines that post-bronchodilator studies should not be done and states why.
- (5) When evaluating based on PFT's, use post-bronchodilator results in applying the evaluation criteria in the rating schedule unless the post-bronchodilator results were poorer than the pre-bronchodilator results. In those cases, use the pre-bronchodilator values for rating purposes.
- (6) When there is a disparity between the results of different PFT's (FEV-1 (Forced Expiratory Volume in one second), FVC (Forced Vital Capacity), etc.), so that the level of evaluation would differ depending on which test result is used, use the test result that the examiner states most accurately reflects the level of disability.
- (7) If the FEV-1 and the FVC are both greater than 100 percent, do not assign a compensable evaluation based on a decreased FEV-1/FVC ratio.

(Authority: 38 U.S.C. 1155)

[34 FR 5062, Mar. 11, 1969, as amended at 61 FR 46727, Sept. 5, 1996; 71 FR 52459, Sept. 6, 2006]

§ 4.97 Schedule of ratings—respiratory system.

		Rating
	DISEASES OF THE NOSE AND THROAT	
6502	Septum, nasal, deviation of: Traumatic only,	
	With 50-percent obstruction of the nasal passage on both sides or complete obstruction on one side	10
6504	Nose, loss of part of, or scars:	
	Exposing both nasal passages	30
	Loss of part of one ala, or other obvious disfigurement	10

Or evaluate as DC 7800, scars, disfiguring, head, face, or neck.
Sinusitis, pansinusitis, chronic.
Sinusitis, ethmoid, chronic.
Sinusitis, frontal, chronic.
Sinusitis, maxillary, chronic. Sinusitis, sphenoid, chronic.
General Rating Formula for Sinusitis (DC's 6510 through 6514):
Following radical surgery with chronic osteomyelitis, or; near constant sinusitis characterized by
headaches, pain and tenderness of affected sinus, and purulent discharge or crusting after re-
peated surgeries
Three or more incapacitating episodes per year of sinusitis requiring prolonged (lasting four to six
weeks) antibiotic treatment, or; more than six non-incapacitating episodes per year of sinusitis
characterized by headaches, pain, and purulent discharge or crusting
One or two incapacitating episodes per year of sinusitis requiring prolonged (lasting four to six weeks) antibiotic treatment, or; three to six non-incapacitating episodes per year of sinusitis char-
acterized by headaches, pain, and purulent discharge or crusting
Detected by X-ray only
Note: An incapacitating episode of sinusitis means one that requires bed rest and treatment by a physician.
Laryngitis, tuberculous, active or inactive.
Rate under §§ 4.88c or 4.89, whichever is appropriate.
Laryngitis, chronic: Hoarseness, with thickening or nodules of cords, polyps, submucous infiltration, or pre-malignant changes on
biopsy
Hoarseness, with inflammation of cords or mucous membrane
Laryngectomy, total.
Rate the residuals of partial laryngectomy as laryngitis (DC 6516), aphonia (DC 6519), or stenosis of larynx
(DC 6520).
Aphonia, complete organic:
Constant inability to communicate by speech
Constant inability to speak above a whisper
Note: Evaluate incomplete aphonia as laryngitis, chronic (DC 6516).
Larynx, stenosis of, including residuals of laryngeal trauma (unilateral or bilateral):
Forced expiratory volume in one second (FEV-1) less than 40 percent of predicted value, with Flow-Volume
Loop compatible with upper airway obstruction, or; permanent tracheostomy
FEV-1 of 40- to 55-percent predicted, with Flow-Volume Loop compatible with upper airway obstruction
FEV-1 of 56- to 70-percent predicted, with Flow-Volume Loop compatible with upper airway obstruction
FEV-1 of 71- to 80-percent predicted, with Flow-Volume Loop compatible with upper airway obstruction
Note: Or evaluate as aphonia (DC 6519).
Pharynx, injuries to:
Stricture or obstruction of pharynx or nasopharynx, or, absence of soft palate secondary to trauma, chemical
burn, or granulomatous disease, or; paralysis of soft palate with swallowing difficulty (nasal regurgitation)
and speech impairment
Allergic or vasomotor rhinitis: With polyps
Without polyps, but with greater than 50-percent obstruction of nasal passage on both sides or complete ob-
struction on one side
struction on one side
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis:
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis:
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertrension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum oxygen consumption of 15 to 20 ml/kg/min (with cardiorespiratory limit)
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertrension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatosis, lethal midline granuloma DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent predicted, or; FEV-1/FVC of 56 to 70 percent, or; DLCO (SB) 56- to 65-percent
Bacterial rhinitis: Rhinoscleroma With permanent hypertrophy of turbinates and with greater than 50-percent obstruction of nasal passage on both sides or complete obstruction on one side Granulomatous rhinitis: Wegener's granulomatosis, lethal midline granuloma Other types of granulomatous infection DISEASES OF THE TRACHEA AND BRONCHI Bronchitis, chronic: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or, cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum oxygen consumption of 15 to 20 ml/kg/min (with cardiorespiratory limit)

		Ratir
	With incapacitating episodes of infection of four to six weeks total duration per year, or; near constant findings of cough with purulent sputum associated with anorexia, weight loss, and frank hemoptysis and requiring	
	antibiotic usage almost continuously	
	weeks) antibiotic usage more than twice a year	
	Note: An incapacitating episode is one that requires bedrest and treatment by a physician.	
302	Asthma, bronchial:	
	FEV-1 less than 40-percent predicted, or; FEV-1/FVC less than 40 percent, or; more than one attack per week with episodes of respiratory failure, or; requires daily use of systemic (oral or parenteral) high dose corticosteroids or immuno-suppressive medications	1
	FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; at least monthly visits to a physician for required care of exacerbations, or; intermittent (at least three per year) courses of systemic (oral or parenteral) corticosteroids	
	FEV-1 of 56- to 70-percent predicted, or; FEV-1/FVC of 56 to 70 percent, or; daily inhalational or oral bron- chodilator therapy, or; inhalational anti-inflammatory medication	
	FEV-1 of 71- to 80-percent predicted, or; FEV-1/FVC of 71 to 80 percent, or; intermittent inhalational or oral bronchodilator therapy	
	Note: In the absence of clinical findings of asthma at time of examination, a verified history of asthmatic attacks must be of record.	
603	Emphysema, pulmonary: FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy. FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-per- cent predicted, or; maximum oxygen consumption of 15 to 20 ml/kg/min (with cardiorespiratory limit)	1
	FEV-1 of 56- to 70-percent predicted, or; FEV-1/FVC of 56 to 70 percent, or; DLCO (SB) 56- to 65-percent predicted	
SO/1	predicted	
504	FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy.	1
	FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum oxygen consumption of 15 to 20 ml/kg/min (with cardiorespiratory limit)	•
	predicted	
	DISEASES OF THE LUNGS AND PLEURA—TUBERCULOSIS Ratings for Pulmonary Tuberculosis Entitled on August 19, 1968	
701	Tuberculosis, pulmonary, chronic, far advanced, active	1
	Tuberculosis, pulmonary, chronic, moderately advanced, active	1
	Tuberculosis, pulmonary, chronic, minimal, active	1
	Tuberculosis, pulmonary, chronic, active, advancement unspecified	'
	Tuberculosis, pulmonary, chronic, nad advanced, inactive.	
23	Tuberculosis, pulmonary, chronic, minimal, inactive.	
24	Tuberculosis, pulmonary, chronic, inactive, advancement unspecified.	
	General Rating Formula for Inactive Pulmonary Tuberculosis: For two years after date of inactivity, following active tuberculosis, which was clinically identified during service or subsequently	1
	Thereafter, for five years, or to eleven years after date of inactivity	
	Following far advanced lesions diagnosed at any time while the disease process was active, minimum	
	tion, impairment of health, etc	

8	1	97

		Rating
treat repo bero 1 to Vete Note (inac thor	(1): The 100-percent rating under codes 6701 through 6724 is not subject to a requirement of precedent hospital trent. It will be reduced to 50 percent for failure to submit to examination or to follow prescribed treatment upon rit to that effect from the medical authorities. When a veteran is placed on the 100-percent rating for inactive turbulosis, the medical authorities will be appropriately notified of the fact, and of the necessity, as given in footnote 38 U.S.C. 1156 (and formerly in 38 U.S.C. 356, which has been repealed by Public Law 90–493), to notify the errans Service Center in the event of failure to submit to examination or to follow treatment. (2): The graduated 50-percent and 30-percent ratings and the permanent 30 percent and 20 percent ratings for titve pulmonary tuberculosis are not to be combined with ratings for other respiratory disabilities. Following acoplasty the rating will be for removal of ribs combined with the rating for collapsed lung. Resection of the ribs dent to thoracoplasty will be rated as removal.	
	Ratings for Pulmonary Tuberculosis Initially Evaluated After August 19, 1968	
6730	Tuberculosis, pulmonary, chronic, active	100
	Note: Active pulmonary tuberculosis will be considered permanently and totally disabling for non-service-connected pension purposes in the following circumstances: (a) Associated with active tuberculosis involving other than the respiratory system. (b) With severe associated symptoms or with extensive cavity formation. (c) Reactivated cases, generally. (d) With advancement of lesions on successive examinations or while under treatment. (e) Without retrogression of lesions or other evidence of material improvement at the end of six months hospitalization or without change of diagnosis from "active" at the end of 12 months hospitalization. Material improvement means lessening or absence of clinical symptoms, and X-ray findings of a stationary or retrogressive lesion.	
6731	Tuberculosis, pulmonary, chronic, inactive: Depending on the specific findings, rate residuals as interstitial lung disease, restrictive lung disease, or, when obstructive lung disease is the major residual, as chronic bronchitis (DC 6600). Rate thoracoplasty as removal of ribs under DC 5297.	
	Note: A mandatory examination will be requested immediately following notification that active tuberculosis evaluated under DC 6730 has become inactive. Any change in evaluation will be carried out under the provisions of §3.105(e).	
6732	Pleurisy, tuberculous, active or inactive: Rate under §§ 4.88c or 4.89, whichever is appropriate.	
	NONTUBERCULOUS DISEASES	
6817	Pulmonary Vascular Disease: Primary pulmonary hypertension, or; chronic pulmonary thromboembolism with evidence of pulmonary hypertension, right ventricular hypertrophy, or cor pulmonale, or; pulmonary hypertension secondary to other obstructive disease of pulmonary arteries or veins with evidence of right ventricular hypertrophy or cor pulmonale	100
	Chronic pulmonary thromboembolism requiring anticoagulant therapy, or; following inferior vena cava surgery without evidence of pulmonary hypertension or right ventricular dysfunction	60 30 0
	Note: Evaluate other residuals following pulmonary embolism under the most appropriate diagnostic code, such as chronic bronchitis (DC 6600) or chronic pleural effusion or fibrosis (DC 6844), but do not combine that evaluation with any of the above evaluations.	·
	Note: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of § 3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.	100
6820		
	Bacterial Infections of the Lung	
	Actinomycosis.	
6823 6824	Nocardiosis. Chronic lung abscess. General Rating Formula for Bacterial Infections of the Lung (diagnostic codes 6822 through 6824):	100
	Interstitial Lung Disease	
6825 6826 6827	Diffuse interstitial fibrosis (interstitial pneumonitis, fibrosing alveolitis). Desquamative interstitial pneumonitis. Pulmonary alveolar proteinosis.	

6846 Sarcoidosis:

§4.97

		Rating
6829 6830 6831 6832	Radiation-induced pulmonary pneumonitis and fibrosis. Hypersensitivity pneumonitis (extrinsic allergic alveolitis). Pneumoconiosis (silicosis, anthracosis, etc.).	
6833	Asbestosis. General Rating Formula for Interstitial Lung Disease (diagnostic codes 6825 through 6833): Forced Vital Capacity (FVC) less than 50-percent predicted, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption with cardiorespiratory limitation, or; cor pulmonale or pulmonary hypertension, or; requires outpatient oxygen therapy FVC of 50- to 64-percent predicted, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum exercise capacity of 15 to 20 ml/kg/min oxygen consumption with cardiorespiratory limitation FVC of 65- to 74-percent predicted, or; DLCO (SB) of 56- to 65-percent predicted	100 60 30 10
	Mycotic Lung Disease	
6834 6835 6836 6837 6838 6839	Coccidioidomycosis.	100
	Chronic pulmonary mycosis with minimal symptoms such as occasional minor hemoptysis or produc-	20
	tive cough Healed and inactive mycotic lesions, asymptomatic	30 0
	Note: Coccidioidomycosis has an incubation period up to 21 days, and the disseminated phase is ordinarily manifest within six months of the primary phase. However, there are instances of dissemination delayed up to many years after the initial infection which may have been unrecognized. Accordingly, when service connection is under consideration in the absence of record or other evidence of the disease in service, service in southwestern United States where the disease is endemic and absence of prolonged residence in this locality before or after service will be the deciding factor.	
	Restrictive Lung Disease	
6840 6841 6842 6843 6844 6845	Spinal cord injury with respiratory insufficiency. Kyphoscoliosis, pectus excavatum, pectus carinatum. Traumatic chest wall defect, pneumothorax, hernia, etc. Post-surgical residual (lobectomy, pneumonectomy, etc.). Chronic pleural effusion or fibrosis. General Rating Formula for Restrictive Lung Disease (diagnostic codes 6840 through 6845): FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy	100
	percent predicted	30
	FEV-1 of 71- to 80-percent predicted, or; FEV-1/FVC of 71 to 80 percent, or; DLCO (SB) 66- to 80-percent predicted	10
	Or rate primary disorder. Note (1): A 100-percent rating shall be assigned for pleurisy with empyema, with or without pleurocutaneous fistula, until resolved.	
	Note (2): Following episodes of total spontaneous pneumothorax, a rating of 100 percent shall be assigned as of the date of hospital admission and shall continue for three months from the first day of the month after hospital discharge.	
	anter nospital discharge. Note (3): Gunshot wounds of the pleural cavity with bullet or missile retained in lung, pain or discomfort on exertion, or with scattered rales or some limitation of excursion of diaphragm or of lower chest expansion shall be rated at least 20-percent disabling. Disabling injuries of shoulder girdle muscles (Groups I to IV) shall be separately rated and combined with ratings for respiratory involvement. Involvement of Muscle Group XXI (DC 5321), however, will not be separately rated.	
6846	Sarcoidosis:	

		Rating
	Cor pulmonale, or; cardiac involvement with congestive heart failure, or; progressive pulmonary disease with fever, night sweats, and weight loss despite treatment	100
	Pulmonary involvement with persistent symptoms requiring chronic low dose (maintenance) or intermittent corticosteroids	30
	Chronic hilar adenopathy or stable lung infiltrates without symptoms or physiologic impairment	0
6847	Sleep Apnea Syndromes (Obstructive, Central, Mixed):	
	Chronic respiratory failure with carbon dioxide retention or cor pulmonale, or; requires tracheostomy	100
	Requires use of breathing assistance device such as continuous airway pressure (CPAP) machine	50
	Persistent day-time hypersomnolence	30
	Asymptomatic but with documented sleep disorder breathing	0

¹ Review for entitlement to special monthly compensation under § 3.350 of this chapter.

[61 FR 46728, Sept. 5, 1996, as amended at 71 FR 28586, May 17, 2006]

THE CARDIOVASCULAR SYSTEM

§ 4.100 Application of the evaluation criteria for diagnostic codes 7000–7007, 7011, and 7015–7020.

- (a) Whether or not cardiac hypertrophy or dilatation (documented by electrocardiogram, echocardiogram, or X-ray) is present and whether or not there is a need for continuous medication must be ascertained in all cases.
- (b) Even if the requirement for a 10% (based on the need for continuous medication) or 30% (based on the presence of cardiac hypertrophy or dilatation) evaluation is met, METs testing is required in all cases except:
- (1) When there is a medical contraindication.
- (2) When the left ventricular ejection fraction has been measured and is 50% or less.
- (3) When chronic congestive heart failure is present or there has been more than one episode of congestive heart failure within the past year.
- (4) When a 100% evaluation can be assigned on another basis.
- (c) If left ventricular ejection fraction (LVEF) testing is not of record, evaluate based on the alternative criteria unless the examiner states that the LVEF test is needed in a particular case because the available medical information does not sufficiently reflect the severity of the veteran's cardiovascular disability.

[71 FR 52460, Sept. 6, 2006]

§§ 4.101-4.103 [Reserved]

§ 4.104 Schedule of ratings—cardiovascular system.

DISEASES OF THE HEART

Rating ●●●● ●●●● Evaluate cor pulmonale, which is a form of secondary heart disease, as part of the pulmonary condition that causes it. ●●●● ●●●● One MET (metabolic equivalent) is the energy cost of standing quietly at rest and represents an oxygen uptake of 3.5 milliliters per kilogram of body weight per minute. When the level of METs at which dyspnea, fatigue, angina, dizziness or syncope develops is required for evaluation, and a laboratory determination of METs by exercise testing cannot be done for medical reasons, an estimation by a medical examiner of the level of activity (expressed in METs and supported by specific examples, such as slow stair climbing or shoveling snow) that results in dyspnea, fatigue, angina, dizziness, or syncope may be used. 7000 Valvular heart disease (including rheumatic heart disease): During active infection with valvular heart damage and for three months following cessation of therapy for the active infec-100 tion .. Thereafter, with valvular heart disease (documented by findings on physical examination and either echocardiogram, Doppler echocardiogram, or cardiac catheterization) resulting in: Chronic congestive heart failure, or; workload of 3 METs or less results in dyspnea, fatigue, angina, dizziness, or syncope, or; left ventricular dysfunction with an ejection fraction of less than 30 percent .. 100 More than one episode of acute congestive heart failure in the past year, or; workload of greater than 3 METs but not greater than 5 METs results in dyspnea, fatique. angina, dizziness, or syncope, or; left ventricular dysfunction with an ejection fraction of 30 to 50 percent. 60

DISEASES OF THE HEART—Continued

With the following in affected parts:

Arthralgia or other pain, numbness, or cold sensitivity plus two or more of the following: tissue loss, nail abnormalities, color changes, locally impaired sensation, hyperhidrosis, X-ray abnormalities (osteoporosis, subarticular punched out lesions, or osteoarthritis)

Arthralgia or other pain, numbness, or cold sensitivity plus tissue loss, nail abnormalities, color changes, locally impaired sensation, hyperhidrosis, or X-ray abnormalities (osteoporosis, subarticular punched out lesions, or osteoarthritis)

Arthralgia or other pain, numbness, or cold sensitivity

NOTE (1): Separately evaluate amputations of fingers or toes, and complications such as squamous cell carcinoma at the site of a cold injury scar or peripheral neuropathy, under other diagnostic codes. Separately evaluate other disabilities that have been diagnosed as the residual effects of cold injury, such as Raynaud's phenomenon, muscle atrophy, etc., unless they are used to support an evaluation under diagnostic code 7122.

NOTE (2): Evaluate each affected part (e.g., hand, foot, ear, nose) separately and combine the ratings in accordance with §§ 4.25 and 4.26.

7123 Soft tissue sarcoma (of vascular origin)

NOTE: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of § 3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.

(Authority: 38 U.S.C. 1155)

[62 FR 65219, Dec. 11, 1997, as amended at 63 FR 37779, July 14, 1998; 71 FR52460, Sept. 6, 2006; 79 FR 2100, Jan. 13, 2014]

THE DIGESTIVE SYSTEM

§ 4.110 Ulcers.

Experience has shown that the term "peptic ulcer" is not sufficiently specific for rating purposes. Manifest differences in ulcers of the stomach or duodenum in comparison with those at an anastomotic stoma are sufficiently recognized as to warrant two separate graduated descriptions. In evaluating the ulcer, care should be taken that the findings adequately identify the particular location.

§4.111 Postgastrectomy syndromes.

There are various postgastrectomy symptoms which may occur following anastomotic operations of the stomach. When present, those occurring during or immediately after eating and known as the "dumping syndrome" are characterized by gastrointestinal complaints and generalized symptoms simulating hypoglycemia; those occurring from 1 to 3 hours after eating usually present definite manifestations of hypoglycemia.

§ 4.112 Weight loss.

For purposes of evaluating conditions in §4.114, the term "substantial weight loss" means a loss of greater than 20 percent of the individual's baseline weight, sustained for three months or longer; and the term "minor weight loss" means a weight loss of 10 to 20 percent of the individual's baseline weight, sustained for three months or longer. The term "inability to gain weight" means that there has been substantial weight loss with inability to regain it despite appropriate therapy. "Baseline weight" means the average weight for the two-year-period preceding onset of the disease.

(Authority: 38 U.S.C. 1155) [66 FR 29488, May 31, 2001]

§ 4.113 Coexisting abdominal conditions.

There are diseases of the digestive system, particularly within the abdomen, which, while differing in the site of pathology, produce a common disability picture characterized in the main by varying degrees of abdominal distress or pain, anemia and disturbances in nutrition. Consequently, certain coexisting diseases in this area, as indicated in the instruction under the title "Diseases of the Digestive System," do not lend themselves to distinct and separate disability evaluations without violating the fundarelating mental principle pyramiding as outlined in §4.14.

§4.114 Schedule of ratings—digestive system.

Ratings under diagnostic codes 7301 to 7329, inclusive, 7331, 7342, and 7345 to 7348 inclusive will not be combined

with each other. A single evaluation will be assigned under the diagnostic code which reflects the predominant disability picture, with elevation to the next higher evaluation where the severity of the overall disability warrants such elevation.

Rating

7200 Mouth, injuries of. Rate as for disfigurement and impairment of function of mastication.
7201 Lips, injuries of.
Rate as for disfigurement of face.
7202 Tongue, loss of whole or part: With inability to communicate by speech
One-half or more
With marked speech impairment
7203 Esophagus, stricture of:
Permitting passage of liquids only, with marked impairment of general health
Severe, permitting liquids only Moderate
7204 Esophagus, spasm of (cardiospasm).
If not amenable to dilation, rate as for the de- gree of obstruction (stricture).
7205 Esophagus, diverticulum of, acquired.
Rate as for obstruction (stricture). 7301 Peritoneum, adhesions of:
Severe; definite partial obstruction shown by X-
ray, with frequent and prolonged episodes of
severe colic distension, nausea or vomiting
following severe peritonitis, ruptured appendix perforated ulcer, or operation with drainage
Moderately severe; partial obstruction mani-
fested by delayed motility of barium meal and
less frequent and less prolonged episodes of pain
Moderate; pulling pain on attempting work or ag-
gravated by movements of the body, or occa-
sional episodes of colic pain, nausea, con- stipation (perhaps alternating with diarrhea) or
abdominal distension
Mild
NOTE: Ratings for adhesions will be considered
when there is history of operative or other traumatic or infectious (intraabdominal) proc-
ess, and at least two of the following: disturb-
ance of motility, actual partial obstruction, re-
flex disturbances, presence of pain. 7304 Ulcer, gastric.
7305 Ulcer, duodenal:
Severe; pain only partially relieved by standard
ulcer therapy, periodic vomiting, recurrent
hematemesis or melena, with manifestations of anemia and weight loss productive of defi-
nite impairment of health
Moderately severe; less than severe but with im-
pairment of health manifested by anemia and weight loss; or recurrent incapacitating epi-
sodes averaging 10 days or more in duration
at least four or more times a year
Moderate; recurring episodes of severe symp- toms two or three times a year averaging 10
days in duration; or with continuous moderate
manifestations
Mild; with recurring symptoms once or twice yearly
7306 Ulcer, marginal (gastrojejunal):

	Rat-
	ing
Pronounced; periodic or continuous pain unrelieved by standard ulcer therapy with peri- odic vomiting, recurring melena or hematemesis, and weight loss. Totally inca-	
pacitating	100

[29 FR 6718, May 22, 1964, as amended at 34 FR 5063, Mar. 11, 1969; 40 FR 42540, Sept. 15, 1975; 41 FR 11301, Mar. 18, 1976; 66 FR 29488, May 31, 2001]

THE GENITOURINARY SYSTEM

§ 4.115 Nephritis.

ing

Albuminuria alone is not nephritis, nor will the presence of transient albumin and casts following acute febrile illness be taken as nephritis. The glomerular type of nephritis is usually preceded by or associated with severe infectious disease: the onset is sudden. and the course marked by red blood cells, salt retention, and edema; it may clear up entirely or progress to a chronic condition. The nephrosclerotic type, originating in hypertension or arteriosclerosis, develops slowly, with minimum laboratory findings, and is associated with natural progress. Separate ratings are not to be assigned for disability from disease of the heart and any form of nephritis, on account of the close interrelationships of cardiovascular disabilities. If, however, absence of a kidney is the sole renal disability, even if removal was required because of nephritis, the absent kidney and any hypertension or heart disease will be separately rated. Also, in the event that chronic renal disease has progressed to the point where regular dialysis is required, any coexisting hypertension or heart disease will be separately rated.

[41 FR 34258, Aug. 13, 1976, as amended at 59 FR 2527, Jan. 18, 1994]

§4.115a Ratings of the genitourinary system—dysfunctions.

Diseases of the genitourinary system generally result in disabilities related to renal or voiding dysfunctions, infections, or a combination of these. The following section provides descriptions of various levels of disability in each of these symptom areas. Where diagnostic codes refer the decisionmaker to these specific areas dysfunction, only the predominant area of dysfunction shall be considered for rating purposes. Since the areas of dysfunction described below do not cover all symptoms resulting from genitourinary diseases, specific diagnoses may include a description of symptoms assigned to that diagnosis.

 $^{^{\}rm 1}\mbox{Review}$ for entitlement to special monthly compensation under $\S\,3.350$ of this chapter.

[59 FR 2527, Jan. 18, 1994; 59 FR 14567, Mar. 29, 1994, as amended at 59 FR 46339, Sept. 8, 1994]

GYNECOLOGICAL CONDITIONS AND DISORDERS OF THE BREAST

§4.116 Schedule of ratings—gynecological conditions and disorders of the breast.

		Rating
	Note 1: Natural menopause, primary	
	amenorrhea, and pregnancy and child-	
	birth are not disabilities for rating pur- poses. Chronic residuals of medical or	
	surgical complications of pregnancy may	
	be disabilities for rating purposes. Note 2: When evaluating any claim involv-	
	ing loss or loss of use of one or more	
	creative organs or anatomical loss of	
	one or both breasts, refer to §3.350 of	
	this chapter to determine whether the	
	veteran may be entitled to special	
	monthly compensation. Footnotes in the	
	schedule indicate conditions which po-	
	tentially establish entitlement to special	
	monthly compensation; however, almost	
	any condition in this section might, under	
	certain circumstances, establish entitle- ment to special monthly compensation.	
7610	Vulva, disease or injury of (including	
	ovaginitis).	
	Vagina, disease or injury of.	
	Cervix, disease or injury of.	
	Uterus, disease, injury, or adhesions of.	
7614	Fallopian tube, disease, injury, or adhesions	
	cluding pelvic inflammatory disease (PID)).	
7615	Ovary, disease, injury, or adhesions of.

THE SKIN

§4.118 Schedule of ratings—skin.

A veteran whose scars were rated by VA under a prior version of diagnostic codes 7800, 7801, 7802, 7803, 7804, or 7805,

100

§4.118

as in effect before October 23, 2008, may request review under diagnostic codes 7800, 7801, 7802, 7804, and 7805, irrespective of whether his or her disability has worsened since the last review. VA will review that veteran's disability rating to determine whether the veteran may be entitled to a higher disability rating under diagnostic codes 7800, 7801, 7802, 7804, and 7805. A request for review pursuant to this rulemaking will be treated as a claim for an increased rating for purposes of determining the effective date of an increased rating awarded as a result of such review; however, in no case will the award be effective before October 23. 2008.

pefore October 23, 2008.	
	Rat- ing
7800 Burn scar(s) of the head, face, or neck; scar(s) of the head, face, or neck due to other causes; or other disfigurement of the head, face, or neck:	
With visible or palpable tissue loss and either gross distortion or asymmetry of three or more features or paired sets of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with six or more characteristics of	
disfigurement With visible or palpable tissue loss and either gross distortion or asymmetry of two features or paired sets of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with four	80
or five characteristics of disfigurement With visible or palpable tissue loss and either gross distortion or asymmetry of one feature or paired set of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with two	50
or three characteristics of disfigurement	30 10
With one characteristic of disfigurement Note (1):The 8 characteristics of disfigurement, for purposes of evaluation under § 4.118, are: Scar 5 or more inches (13 or more cm.) in length.	10
Scar at least one-quarter inch (0.6 cm.) wide at widest part.	
Surface contour of scar elevated or depressed on palpation.	
Scar adherent to underlying tissue.	
Skin hypo-or hyper-pigmented in an area exceeding six square inches (39 sg. cm.).	
Skin texture abnormal (irregular, atrophic, shiny, scaly, etc.) in an area exceeding six square inches (39 sq. cm.).	
Underlying soft tissue missing in an area exceeding six square inches (39 sq. cm.).	
Skin indurated and inflexible in an area ex-	

ceeding six square inches (39 sq. cm.).

	Rat- ing
Note (2): Rate tissue loss of the auricle under DC 6207 (loss of auricle) and ana- tomical loss of the eye under DC 6061 (anatomical loss of both eyes) or DC 6063 (anatomical loss of one eye), as ap-	
6063 (anatomical loss of one eye), as appropriate. Note (3): Take into consideration unretouched color photographs when evaluating under these criteria. Note (4): Separately evaluate disabling effects other than disfigurement that are associated with individual scar(s) of the head, face, or neck, such as pain, instability, and residuals of associated muscle or nerve injury, under the appropriate diagnostic code(s) and apply § 4.25 to combine the evaluation(s) with the evaluation assigned under this diagnostic code. Note (5): The characteristic(s) of disfigurement may be caused by one scar or by multiple scars; the characteristic(s) required to assign a particular evaluation need not be caused by a single scar in	
order to assign that evaluation. 7801 Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are deep and	
nonlinear: Area or areas of 144 square inches (929 sq. cm.) or greater Area or areas of at least 72 square inches	40
(465 sq. cm.) but less than 144 square inches (929 sq. cm.)	30
(77 sq. cm.) but less than 72 square inches (465 sq. cm.)	20
(39 sq. cm.) but less than 12 square inches (77 sq. cm.)	10
with underlying soft tissue damage. Note (2): If multiple qualifying scars are present, or if a single qualifying scar affects more than one extremity, or a single qualifying scar affects one or more extremities and either the anterior portion or posterior portion of the trunk, or both, or a single qualifying scar affects both the anterior portion and the posterior portion of the trunk, assign a separate evaluation for each affected extremity based on the total area of the qualifying scars that affect that extremity, assign a separate evaluation based on the total area of the qualifying scars that affect the anterior portion of the trunk, and assign a separate evaluation based on the total area of the qualifying scars that affect the posterior portion of the trunk. The midaxillary line on each side separates the anterior and posterior portions of the trunk. Combine the separate evaluations under §4.25. Qualifying scars are scars that are nonlinear, deep, and are not located on the head, face, or	

neck.

and nonlinear:

	function)
	Hyperaldosteronism (benign or malignant)
	Pheochromocytoma (benign or malignant)
N	OTE: Evaluate diagnostic codes 7916, 7917, and
	7918 as malignant or benign neoplasm as ap-

propriate.

7919 C-cell hyperplasia of the thyroid NOTE: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residu-

[61 FR 20446, May 7, 1996]

NEUROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS

§ 4.120 Evaluations by comparison.

Disability in this field is ordinarily to be rated in proportion to the impairment of motor, sensory or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, injury to the skull, etc. In rating disability from the conditions in the preceding sentence refer to the appropriate schedule. In rating peripheral nerve injuries and their residuals, attention should be given to the site and character of the injury, the relative impairment in motor function, trophic changes, or sensory disturbances.

§ 4.121 Identification of epilepsy.

When there is doubt as to the true nature of epileptiform attacks, neurological observation in a hospital adequate to make such a study is necessary. To warrant a rating for epilepsy, the seizures must be witnessed or verified at some time by a physician. As to frequency, competent, consistent lay testimony emphasizing convulsive and immediate post-convulsive characteristics may be accepted. The frequency of seizures should ascertained under the ordinary conditions of life (while not hospitalized).

§ 4.122 Psychomotor epilepsy.

ing

The term psychomotor epilepsy refers to a condition that is characterized by seizures and not uncommonly by a chronic psychiatric disturbance as well.

(a) Psychomotor seizures consist of episodic alterations in conscious control that may be associated with automatic states, generalized convulsions, random motor movements (chewing, lip smacking, fumbling), hallucinatory phenomena (involving taste, smell, sound, vision), perceptual illusions (deja vu, feelings of loneliness, strangeness, macropsia, micropsia, dreamy states), alterations in thinking (not open to reason), alterations in memory, abnormalities of mood or affect (fear, alarm, terror, anger, dread, wellbeing), and autonomic disturbances (sweating, pallor, flushing of the face, visceral phenomena such as nausea, vomiting, defecation, a rising feeling of warmth in the abdomen). Automatic states or automatisms are characterized by episodes of irrational, irrelevant. disjointed. unconventional. asocial, purposeless though seemingly coordinated and purposeful, confused or inappropriate activity of one to several minutes (or, infrequently, hours) duration with subsequent amnesia for the seizure. Examples: A person of high social standing remained seated, muttered angrily, and rubbed the arms of his chair while the National Anthem was being played; an apparently normal person suddenly disrobed in public; a man traded an expensive automobile for an antiquated automobile in poor mechanical condition and after regaining conscious control, discovered that he had signed an agreement to pay an additional sum of money in the trade. The seizure manifestations of psychomotor epilepsy vary from patient to patient and in the same patient from seizure to seizure.

(b) A chronic mental disorder is not uncommon as an interseizure manifestation of psychomotor epilepsy and may include psychiatric disturbances extending from minimal anxiety to severe personality disorder (as distinguished from developmental) or almost complete personality disintegration (psychosis). The manifestations of a chronic mental disorder associated

with psychomotor epilepsy, like those of the seizures, are protean in character.

§4.123 Neuritis, cranial or peripheral.

Neuritis, cranial or peripheral, characterized by loss of reflexes, muscle atrophy, sensory disturbances, and constant pain, at times excruciating, is to be rated on the scale provided for injury of the nerve involved, with a maximum equal to severe, incomplete, paralysis. See nerve involved for diagnostic code number and rating. The maximum rating which may be assigned for neuritis not characterized by organic changes referred to in this section will be that for moderate, or with sciatic nerve involvement, for moderately severe, incomplete paralysis.

§ 4.124 Neuralgia, cranial or peripheral.

Neuralgia, cranial or peripheral, characterized usually by a dull and intermittent pain, of typical distribution so as to identify the nerve, is to be rated on the same scale, with a maximum equal to moderate incomplete paralysis. See nerve involved for diagnostic code number and rating. Tic douloureux, or trifacial neuralgia, may be rated up to complete paralysis of the affected nerve.

§ 4.124a Schedule of ratings—neurological conditions and convulsive disorders.

[With the exceptions noted, disability from the following diseases and their residuals may be rated from 10 percent to 100 percent in proportion to the impairment of motor, sensory, or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, etc., referring to the appropriate bodily system of the schedule. With partial loss of use of one or more extremities from neurological lesions, rate by comparison with the mild, moderate, severe, or complete paralysis of peripheral nerves]

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

ing

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

NOTE: It is required for the minimum ratings for residuals under diagnostic codes 8000–8025, that there be ascertainable residuals. Determinations as to the presence of residuals not capable of objective verification, i.e., headaches, dizziness, fatigability, must be approached on the basis of the diagnosis recorded; subjective residuals will be accepted when consistent with the disease and not more likely attributable to other disease or no disease. It is of exceptional importance that when ratings in excess of the prescribed minimum ratings are assigned, the diagnostic codes utilized as bases of evaluation be cited, in addition to the codes identifying the diagnoses.

8045 Residuals of traumatic brain injury (TBI):

There are three main areas of dysfunction that may result from TBI and have profound effects on functioning: cognitive (which is common in varying degrees after TBI), emotional/behavioral, and physical. Each of these areas of dysfunction may require evaluation.

Cognitive impairment is defined as decreased memory, concentration, attention, and executive functions of the brain. Executive functions are goal setting, speed of information processing, planning, organizing, prioritizing, self-monitoring, problem solving, judgment, decision making, spontaneity, and flexibility in changing actions when they are not productive. Not all of these brain functions may be affected in a given individual with cognitive impairment, and some functions may be affected more severely than others. In a given individual, symptoms may fluctuate in severity from day to day. Evaluate cognitive impairment under the table titled "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified."

Subjective symptoms may be the only residual of TBI or may be associated with cognitive impairment or other areas of dysfunction. Evaluate subjective symptoms that are residuals of TBI, whether or not they are part of cognitive impairment, under the subjective symptoms facet in the table titled "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified." However, separately evaluate any residual with a distinct diagnosis that may be evaluated under another diagnostic code, such as migraine headache or Meniere's disease, even if that diagnosis is based on subjective symptoms, rather than under the "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified" table.

Evaluate emotional/behavioral dysfunction under § 4.130 (Schedule of ratings—mental disorders) when there is a diagnosis of a mental disorder. When there is no diagnosis of a mental disorder, evaluate emotional/behavioral symptoms under the criteria in the table titled "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified.".

Evaluate physical (including neurological) dysfunction based on the following list, under an appropriate diagnostic code: Motor and sensory dysfunction, including pain, of the extremities and face; visual impairment; hearing loss and tinnitus; loss of sense of smell and taste; seizures; gait, coordination, and balance problems; speech and other communication difficulties, including aphasia and related disorders, and dysarthria; neurogenic bladder; neurogenic bowel; cranial nerve dysfunctions; autonomic nerve dysfunctions; and endocrine dysfunctions.

The preceding list of types of physical dysfunction does not encompass all possible residuals of TBI. For residuals not listed here that are reported on an examination, evaluate under the most appropriate diagnostic code. Evaluate each condition separately, as long as the same signs and symptoms are not used to support more than one evaluation, and combine under \$4.25 the evaluations for each separately rated condition. The evaluation assigned based on the "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified" table will be considered the evaluation for a single condition for purposes of combining with other disability evaluations.

Consider the need for special monthly compensation for such problems as loss of use of an extremity, certain sensory impairments, erectile dysfunction, the need for aid and attendance (including for protection from hazards or dangers incident to the daily environment due to cognitive impairment), being housebound, etc.

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

	Rat- ing
Evaluation of Cognitive Impairment and Subjective Symptoms	

The table titled "Evaluation of Cognitive Impairment and Other Residuals of TBI Not Otherwise Classified" contains 10 important facets of TBI related to cognitive impairment and subjective symptoms. It provides criteria for levels of impairment for each facet, as appropriate, ranging from 0 to 3, and a 5th level, the highest level of impairment, labeled "total." However, not every facet has every level of severity. The Consciousness facet, for example, does not provide for an impairment level other than "total," since any level of impaired consciousness would be totally disabling. Assign a 100-percent evaluation if "total" is the level of evaluation for one or more facets. If no facet is evaluated as "total," assign the overall percentage evaluation based on the level of the highest facet as follows: 0 = 0 percent; 1 = 10 percent; 2 = 40 percent; and 3 = 70 percent. For example, assign a 70 percent evaluation if 3 is the highest level of evaluation for any facet.

Note (1): There may be an overlap of manifestations of conditions evaluated under the table titled "Evaluation Of Cognitive Impairment And Other Residuals Of TBI Not Otherwise Classified" with manifestations of a comorbid mental or neurologic or other physical disorder that can be separately evaluated under another diagnostic code. In such cases, do not assign more than one evaluation based on the same manifestations. If the manifestations of two or more conditions cannot be clearly separated, assign a single evaluation under whichever set of diagnostic criteria allows the better assessment of overall impaired functioning due to both conditions. However, if the manifestations are clearly separatele, assign a separate evaluation for each condition.

Note (2): Symptoms listed as examples at certain evaluation levels in the table are only examples and are not symptoms that must be present in order to assign a particular evaluation.

Note (3): "Instrumental activities of daily living" refers to activities other than self-care that are needed for independent living, such as meal preparation, doing housework and other chores, shopping, traveling, doing laundry, being responsible for one's own medications, and using a telephone. These activities are distinguished from "Activities of daily living," which refers to basic self-care and includes bathing or showering, dressing, eating, getting in or out of bed or a chair, and using the toilet.

Note (4): The terms "mild," "moderate," and "severe" TBI, which may appear in medical records, refer to a classification of TBI made at, or close to, the time of injury rather than to the current level of functioning. This classification does not affect the rating assigned under diagnostic code

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

Note (5): A veteran whose residuals of TBI are rated under a version of §4.124a, diagnostic code 8045, in effect before Octoagricult code 50-5, in short school 50-5 ber 23, 2008 may request review under diagnostic code 8045, irrespective of whether his or her disability has worsened since the last review. VA will review that veteran's disability rating to determine whether the veteran may be entitled to a higher disability rating under diagnostic code 8045. A request for review pursuant to this note will be treated as a claim for an increased rating for purposes of determining the effective date of an increased rating awarded as a result of such review however, in no case will the award be effective before October 23, 2008. For the purposes of determining the effective date of an increased rating awarded as a result of such review, VA will apply 38 CFR 3.114, if applicable..

8046 Cerebral arteriosclerosis:

Purely neurological disabilities, such as hemiplegia, cranial nerve paralysis, etc., due to cerebral arteriosclerosis will be rated under the diagnostic codes dealing with such specific disabilities, with citation of a hyphenated diagnostic code (e.g., 8046–8207).

Purely subjective complaints such as headache, dizziness, tinnitus, insomnia and irritability, recognized as symptomatic of a properly diagnosed cerebral arteriosclerosis, will be rated 10 percent and no more under diagnostic code 9305. This 10 percent rating will not be combined with any other rating for a disability due to cerebral or generalized arteriosclerosis. Ratings in excess of 10 percent for cerebral arteriosclerosis under diagnostic code 9305 are not assignable in the absence of a diagnosis of multi-infarct dementia with cerebral arteriosclerosis.

NOTE: The ratings under code 8046 apply only when the diagnosis of cerebral arteriosclerosis is substantiated by the entire clinical picture and not solely on findings of retinal arteriosclerosis.

EVALUATION OF COGNITIVE IMPAIRMENT AND OTHER RESIDUALS OF TBI NOT OTHERWISE CLASSIFIED

THE EPILEPSIES

	Rat
A thorough study of all material in §§ 4.121 and 4.122 of the preface and under the ratings for epilepsy is necessary prior to any rating action.	
8910 Epilepsy, grand mal.	
Rate under the general rating formula for major seizures.	
8911 Enilensy netit mal	

	Rat- ing
Rate under the general rating formula for minor	
seizures. NOTE (1): A major seizure is characterized by	
the generalized tonic-clonic convulsion with unconsciousness.	
NOTE (2): A minor seizure consists of a brief	
interruption in consciousness or conscious control associated with staring or rhythmic blinking of the eyes or nodding of the head ("pure" petit mal), or sudden jerking movements of the arms, trunk, or head (myoclonic	
type) or sudden loss of postural control	
(akinetic type). General Rating Formula for Major and Minor Epileptic Seizures:	
Averaging at least 1 major seizure per	
month over the last year Averaging at least 1 major seizure in 3	100
months over the last year; or more than 10 minor seizures weekly	80
Averaging at least 1 major seizure in 4 months over the last year; or 9–10 minor	
seizures per week	60
or 2 in the last year; or averaging at least	
5 to 8 minor seizures weekly At least 1 major seizure in the last 2 years;	40
or at least 2 minor seizures in the last 6	
months	20
A confirmed diagnosis of epilepsy with a history of seizures	10
NOTE (1): When continuous medication is shown	
necessary for the control of epilepsy, the min- imum evaluation will be 10 percent. This rating	
will not be combined with any other rating for	
epilepsy. NOTE (2): In the presence of major and minor	
seizures, rate the predominating type.	
NOTE (3): There will be no distinction between	
diurnal and nocturnal major seizures.	
8912 Epilepsy, Jacksonian and focal motor or sensory.	
8913 Epilepsy, diencephalic.	
Rate as minor seizures, except in the presence	
of major and minor seizures, rate the predomi-	
nating type. 8914 Epilepsy, psychomotor.	
Major seizures:	
Psychomotor seizures will be rated as major	
seizures under the general rating formula when characterized by automatic states	
and/or generalized convulsions with un-	
consciousness.	
Minor seizures:	
Psychomotor seizures will be rated as minor seizures under the general rating formula	
when characterized by brief transient epi-	
sodes of random motor movements, hallu-	
cinations, perceptual illusions, abnormali- ties of thinking, memory or mood, or auto-	
nomic disturbances.	

Mental Disorders in Epilepsies: A nonpsychotic organic brain syndrome will be rated separately under the appropriate diagnostic code (e.g., 9304 or 9326). In the absence of a diagnosis of non-psychotic organic psychiatric disturbance (psychotic, psychoneurotic or personality disorder) if diagnosed and shown to be secondary to or directly associated with epilepsy will be rated separately. The psychotic or psychroneurotic disorder will be rated under the appropriate diagnostic code. The personality disorder will be rated as a dementia (e.g., diagnostic code 9304 or 9326).

Epilepsy and Unemployability: (1) Rating specialists must bear in mind that the epileptic, although his or her seizures are controlled, may find employment and rehabilitation difficult of attainment due to employer reluctance to the hiring of the

(2) Where a case is encountered with a definite history of unemployment, full and complete development should be un-dertaken to ascertain whether the epilepsy is the determining factor in his or her inability to obtain employment.

(3) The assent of the claimant should first be obtained for

op/me assent of the chainfail should his be obtained by open some of this survey. The purpose of this survey is to secure all the relevant facts and data necessary to permit of a true judgment as to the reason for his or her unemployment and should include information

(a) Education;
(b) Occupations prior and subsequent to service;
(c) Places of employment and reasons for termination;
(d) Wages received;
(e) Number of seizures.
(4) Upon completion of this survey and current examination, the case should have rating board consideration. Where in the judgment of the rating board the veteran's unemployability is due to epilepsy and jurisdiction is not vested in that body by reason of schedular evaluations, the case should be submitted to the Compensation Service or the Director, Pension and Fiduciary Service. and Fiduciary Service.

MENTAL DISORDERS

§ 4.125 Diagnosis of mental disorders.

(a) If the diagnosis of a mental disorder does not conform to DSM-5 or is not supported by the findings on the examination report, the rating agency shall return the report to the examiner to substantiate the diagnosis. Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5), American Psychiatric Association (2013), is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Department of Veterans Affairs must publish notice of change in the FEDERAL REGISTER and the material must be available to the public. All approved material is available from the American Psychiatric Association, 1000 Wilson Boulevard, Suite 1825, Arlington, VA 22209-3901, 703-907-7300, http://www.dsm5.org. It is also available for inspection at the Office of Regulation Policy and Management, Department of Veterans Affairs, 810 Vermont Avenue NW., Room 1068,

Washington, DC 20420. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this information at NARA, call 202–741–6030 or go to http://www.archives.gov/federal register/ code of federal regulations/ ibr publications.html.

(b) If the diagnosis of a mental disorder is changed, the rating agency shall determine whether the new diagnosis represents progression of the prior diagnosis, correction of an error in the prior diagnosis, or development of a new and separate condition. If it is not clear from the available records what the change of diagnosis represents, the rating agency shall return the report to the examiner for a determination.

(Authority: 38 U.S.C. 1155)

[61 FR 52700, Oct. 8, 1996, as amended at 79 FR 45099, Aug. 4, 2014]

§4.126 Evaluation of disability from mental disorders.

- (a) When evaluating a mental disorder, the rating agency shall consider the frequency, severity, and duration of psychiatric symptoms, the length of remissions, and the veteran's capacity for adjustment during periods of remission. The rating agency shall assign an evaluation based on all the evidence of record that bears on occupational and social impairment rather than solely on the examiner's assessment of the level of disability at the moment of the examination.
- (b) When evaluating the level of disability from a mental disorder, the rating agency will consider the extent of social impairment, but shall not assign an evaluation solely on the basis of social impairment.
- (c) Neurocognitive disorders shall be evaluated under the general rating formula for mental disorders; neurologic deficits or other impairments stemming from the same etiology (e.g., a head injury) shall be evaluated separately and combined with the evaluation for neurocognitive disorders (see § 4.25).
- (d) When a single disability has been diagnosed both as a physical condition and as a mental disorder, the rating

§4.127

agency shall evaluate it using a diagnostic code which represents the dominant (more disabling) aspect of the condition (see § 4.14).

(Authority: 38 U.S.C. 1155)

[61 FR 52700, Oct. 8, 1996, as amended at 79 FR 45099, Aug. 4, 2014]

§4.127 Intellectual disability (intellectual developmental disorder) and personality disorders.

Intellectual disability (intellectual developmental disorder) and personality disorders are not diseases or injuries for compensation purposes, and, except as provided in §3.310(a) of this chapter, disability resulting from them may not be service-connected. However, disability resulting from a mental disorder that is superimposed upon intellectual disability (intellectual developmental disorder) or a personality disorder may be service-connected.

(Authority: 38 U.S.C. 1155) [79 FR 45100, Aug. 4, 2014]

§ 4.128 Convalescence ratings following extended hospitalization.

If a mental disorder has been assigned a total evaluation due to a continuous period of hospitalization lasting six months or more, the rating agency shall continue the total evaluation indefinitely and schedule a mandatory examination six months after the veteran is discharged or released to nonbed care. A change in evaluation based on that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§4.129 Mental disorders due to traumatic stress.

When a mental disorder that develops in service as a result of a highly stressful event is severe enough to bring about the veteran's release from active military service, the rating agency shall assign an evaluation of not less than 50 percent and schedule an examination within the six month period following the veteran's discharge to determine whether a change in evaluation is warranted.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§4.130 Schedule of ratings-Mental disorders.

The nomenclature employed in this portion of the rating schedule is based upon the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) (see §4.125 for availability information). Rating agencies must be thoroughly familiar with this manual to properly implement the directives in §4.125 through §4.129 and to apply the general rating formula for mental disorders in §4.130. The schedule for rating for mental disorders is set forth as follows:

```
9201
     Schizophrenia
```

[Removed] Delusional disorder

Other specified and unspecified schizophrenia spectrum and other psychotic disorders

9211 Schizoaffective disorder

Delirium

9301 Major or mild neurocognitive disorder due to HIV or other infections

9304 Major or mild neurocognitive disorder due to traumatic brain injury

9305 Major or mild vascular neurocognitive disorder

9310 Unspecified neurocognitive disorder

9312 Major or mild neurocognitive disorder due to Alzheimer's disease

9326 Major or mild neurocognitive disorder due to another medical condition or substance/medication-induced major or mild neurocognitive disorder

9327 [Removed]

9400 Generalized anxiety disorder

9403 Specific phobia; social anxiety disorder (social phobia)

9404 Obsessive compulsive disorder

9410 Other specified anxiety disorder

9411 Posttraumatic stress disorder Panic disorder and/or agoraphobia 9412

Unspecified anxiety disorder

identity disorder
7 Deport dissociative 9416 Dissociative

9417 Depersonalization/Derealization disorder

9421 Somatic symptom disorder

Other specified somatic symptom and related disorder

9423 Unspecified somatic symptom and related disorder

⁹²⁰² [Removed]

⁹²⁰³ [Removed]

[[]Removed]

9424 Conversion disorder (functional neurological symptom disorder) 9435 Illness anxiety disorder 9431 Cyclothymic disorder 9432 Bipolar disorder 9436 Chronic adjustment disorder 9440 Chronic adjustment disorder

GENERAL RATING FORMULA FOR MENTAL DISORDERS

	Rating
Total occupational and social impairment, due to such symptoms as: gross impairment in thought processes or communication; persistent delusions or hallucinations; grossly inappropriate behavior; persistent danger of hurting self or others; intermittent inability to perform activities of daily living (including maintenance of minimal personal hygiene); disorientation to time or place; memory loss for names of close relatives, own occupation, or own name. Occupational and social impairment, with deficiencies in most areas, such as work, school, family relations, judg-	100
ment, thinking, or mood, due to such symptoms as: suicidal ideation; obsessional rituals which interfere with rou- tine activities; speech intermittently illogical, obscure, or irrelevant; near-continuous panic or depression affecting the ability to function independently, appropriately and effectively; impaired impulse control (such as unprovoked irritability with periods of violence); spatial disorientation; neglect of personal appearance and hygiene; difficulty in adapting to stressful circumstances (including work or a worklike setting); inability to establish and maintain effec-	
tive relationships. Occupational and social impairment with reduced reliability and productivity due to such symptoms as: flattened af-	70
fect; circumstantial, circumlocutory, or stereotyped speech; panic attacks more than once a week; difficulty in understanding complex commands; impairment of short- and long-term memory (e.g., retention of only highly learned material, forgetting to complete tasks); impairmed judgment; impaired abstract thinking; disturbances of motivation and mood; difficulty in establishing and maintaining effective work and social relationships.	50
Occupational and social impairment with occasional decrease in work efficiency and intermittent periods of inability to perform occupational tasks (although generally functioning satisfactorily, with routine behavior, self-care, and conversation normal), due to such symptoms as: depressed mood, anxiety, suspiciousness, panic attacks (weekly	20
or less often), chronic sleep impairment, mild memory loss (such as forgetting names, directions, recent events). Occupational and social impairment due to mild or transient symptoms which decrease work efficiency and ability to perform occupational tasks only during periods of significant stress, or symptoms controlled by continuous medication.	30
A mental condition has been formally diagnosed, but symptoms are not severe enough either to interfere with occu-	
pational and social functioning or to require continuous medication.	0

9520 Anorexia nervosa 9521 Bulimia nervosa

RATING FORMULA FOR EATING DISORDERS

	Rating
Self-induced weight loss to less than 80 percent of expected minimum weight, with incapacitating episodes of at	
least six weeks total duration per year, and requiring hospitalization more than twice a year for parenteral nutrition or tube feeding.	100
Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of six or	
more weeks total duration per year.	60
Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of more than two but less than six weeks total duration per year.	30
Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight gain even when below expected minimum weight, with diagnosis of an eating disorder and incapacitating episodes of up to two weeks total duration per year.	10
Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight	
gain even when below expected minimum weight, with diagnosis of an eating disorder but without incapacitating	
episodes.	1 0

Note 1: An incapacitating episode is a period during which bed rest and treatment by a physician are required.

Note 2: Ratings under diagnostic codes 9201 to 9440 will be evaluated using the General Rating Formula for Mental Disorders. Ratings under diagnostic codes 9520 and 9521 will be evaluated using the General Rating Formula for Eating Disorders.

9417 Added November 7, 1996; Title August 4, 2014. 9421 Added November 7, 1996; Title August 4, 2014. 9422 Added November 7, 1996; Title August 4, 2014. 9423 Added November 7, 1996; Title August 4, 2014. 9424 Added November 7, 1996; Title August 4, 2014. 9425 Added November 7, 1996; Title August 4, 2014. 9426 Added November 7, 1996; Title August 4, 2014. 9431 Added November 7, 1996; Title August 4, 2014. 9432 Added November 7, 1996; Title August 4, 2014. 9433 Added November 7, 1996; Title August 4, 2014. 9434 Added November 7, 1996; Title August 4, 2014. 9435 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996. 9430 Criterion March 10, 1976; criterion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976; criterion February 3, 1988. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9506 Added March 10, 1976; criterion February 3, 1988. 9507 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9511 Added November 7, 1996. 9521 Added November 7, 1996. 9531 Criterion February 17, 1994. 9532 Criterion February 17, 1994. 9533 Criterion February 17, 1994. 9544 Criterion February 17, 1994. 9555 Criterion February 17, 1994. 9566 Criterion February 17, 1994. 9576 Criterion February 17, 1994. 9576 Criterion February 17, 1994.			
9422 Added November 7, 1996; Title August 4, 2014. 9424 Added November 7, 1996; Title August 4, 2014. 9425 Added November 7, 1996; Title August 4, 2014. 9426 Added November 7, 1996; Title August 4, 2014. 9431 Added November 7, 1996. 9432 Added November 7, 1996. 9433 Added November 7, 1996; Title August 4, 2014. 9434 Added November 7, 1996; Title August 4, 2014. 9435 Added November 7, 1996. 9436 Added November 7, 1996. 9500 Criterion March 10, 1976; criterion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976; criterion February 3, 1988. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9506 Added March 10, 1976; criterion February 3, 1988. 9507 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9512 Added March 10, 1976; criterion February 3, 1988. 9514 Added March 10, 1976; criterion February 3, 1988. 9515 Added March 10, 1976; criterion February 3, 1988. 9516 Added March 10, 1976; criterion February 3, 1988. 9517 Added March 10, 1976; criterion February 3, 1988. 9518 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9512 Added March 10, 1976; criterion February 3, 1988. 9514 Added March 10, 1976; criterion February 3, 1988. 9516 Added November 7, 1996. 9517 Added March 10, 1978; criterion February 17, 1994. 9518 Criterion February 17, 1994. 9519 Criterion September 22, 1978; evaluation February 17, 1994.			Added November 7, 1996; Title August 4, 2014.
9423 Added November 7, 1996; Title August 4, 2014. 9425 Added November 7, 1996; Title August 4, 2014. 9426 Added November 7, 1996; Title August 4, 2014. 9431 Added November 7, 1996. 9432 Added November 7, 1996. 9433 Added November 7, 1996; Title August 4, 2014. 9434 Added November 7, 1996; Title August 4, 2014. 9435 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9500 Criterion March 10, 1976; Criterion February 3, 1988. 9501 Criterion March 10, 1976; Criterion February 3, 1988. 9502 Criterion March 10, 1976; Criterion February 3, 1988. 9503 Added March 10, 1976; Criterion February 3, 1988. 9504 Added March 10, 1976; Criterion February 3, 1988. 9508 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9400 Added March 10, 1976; Criterion February 3, 1988. 9401 Added March 10, 1976; Criterion February 3, 1988. 9402 Added Movember 7, 1996. 9403 Criterion February 17, 1994. 9404 Park 1996			
9424 Added November 7, 1996; Title August 4, 2014. 9431 Added November 7, 1996. 9432 Added November 7, 1996. 9433 Added November 7, 1996. 9434 Added November 7, 1996. 9435 Added November 7, 1996. 9436 Added November 7, 1996; Title August 4, 2014. 9436 Added November 7, 1996; Title August 4, 2014. 9437 Added November 7, 1996; Title August 4, 2014. 9438 Added November 7, 1996; Title August 4, 2014. 9439 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Title August 4, 2014. 9440 Added November 7, 1996; Titlerion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Added March 10, 1976; Criterion February 3, 1988. 9404 Added March 10, 1976; Criterion February 3, 1988. 9406 Added March 10, 1976; Criterion February 3, 1988. 9408 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added March 10, 1976; Criterion February 3, 1988. 9409 Added Movember 7, 1996. 9501 Added Movember 7, 1996. 9502 Criterion February 17, 1994. 9503 Criterion February 17, 1994. 9504 Criterion February 17, 1994. 9505 Criterion February 17, 1994. 9506 Criterion September 22, 1978; evaluation February 17, 1994.			
9425 Added November 7, 1996; Title August 4, 2014. 9431 Added November 7, 1996. 9432 Added November 7, 1996. 9433 Added November 7, 1996; Title August 4, 2014. 9434 Added November 7, 1996. 9435 Added November 7, 1996. 9440 Added November 7, 1996. 9500 Criterion March 10, 1976; criterion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976; criterion February 3, 1988. 9504 Criterion September 9, 1975; removed March 10, 1976. 9505 Added March 10, 1976; criterion February 3, 1988. 9406 Added March 10, 1976; criterion February 3, 1988. 9407 Added March 10, 1976; criterion February 3, 1988. 9408 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9400 Added March 10, 1976; criterion February 3, 1988. 9401 Added March 10, 1976; criterion February 3, 1988. 9402 Added November 7, 1996. 9403 Criterion February 17, 1994. 9404 Park 18			
9432			
9433 Added November 7, 1996; Title August 4, 2014. 9434 Added November 7, 1996; Title August 4, 2014. 9435 Added November 7, 1996. 9440 Added November 7, 1996. 9500 Criterion March 10, 1976; criterion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9406 Added March 10, 1976; criterion February 3, 1988. 9407 Added March 10, 1976; criterion February 3, 1988. 9408 Added March 10, 1976; criterion February 3, 1988. 9408 Added March 10, 1976; criterion February 3, 1988. 9409 Added March 10, 1976; criterion February 3, 1988. 9501 Added March 10, 1976; criterion February 3, 1988. 9502 Added March 10, 1976; criterion February 3, 1988. 9503 Added March 10, 1976; criterion February 3, 1988. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9506 Added November 7, 1996. 9507 Added November 7, 1996. 9508 Added November 7, 1996. 9509 Criterion February 17, 1994. 9500 Criterion February 17, 1994. 9501 Criterion February 17, 1994. 9502 Criterion February 17, 1994. 9503 Criterion September 22, 1978; evaluation February 17, 1994.			Added November 7, 1996.
9434 Added November 7, 1996. Added November 7, 1996. 9440 Added November 7, 1996. 1996; Criterion February 3, 1988. 9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976; criterion February 3, 1988. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9506 Added March 10, 1976; criterion February 3, 1988. 9507 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9520 Added March 10, 1976; criterion February 3, 1988. Added March 10, 1976; criterion February 3, 1988. 9520 Added November 7, 1996. 9521 Added November 7, 1996. 9521 Added November 7, 1996. 9620 Criterion February 17, 1994. 9902 Criterion February 17, 1994. 9903 Criterion February 17, 1994. 9903 Criterion February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994. 9905 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906 9906			
9435			
9440			
9501 Criterion March 10, 1976; criterion February 3, 1988. 9502 Criterion March 10, 1976; criterion February 3, 1988. 9503 Removed March 10, 1976; criterion February 3, 1988. 9504 Added March 10, 1976; criterion February 3, 1988. 9505 Added March 10, 1976; criterion February 3, 1988. 9507 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9521 Added March 10, 1976; criterion February 3, 1988. 9521 Added March 10, 1976; criterion February 3, 1988. 9521 Added Movember 7, 1996. 9521 Added November 7, 1996. 9521 Criterion September 22, 1978; criterion February 17, 1994. 9502 Criterion February 17, 1994. 9503 Criterion February 17, 1994. 9504 Criterion September 22, 1978; evaluation February 17, 1994.			Added November 7, 1996.
9502			
9503 Removed March 10, 1976. 9504 Criterion September 9, 1975; removed March 10, 1976. 9505 Added March 10, 1976; criterion February 3, 1988. 9506 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9512 Added November 7, 1996. 9521 Added November 7, 1996. 9521 Criterion September 22, 1978; criterion February 17, 1994. 9902 Criterion February 17, 1994. 9903 Criterion February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994.			
9504 Criterion September 9, 1975; removed March 10, 1976.			
9506 Added March 10, 1976; criterion February 3, 1988. 4dded March 10, 1976; criterion February 3, 1988. 4dded March 10, 1976; criterion February 3, 1988. 4dded March 10, 1976; criterion February 3, 1988. 8509 Added March 10, 1976; criterion February 3, 1988. Added Movember 7, 1996; criterion February 3, 1988. Added Movember 7, 1996. Added November 7, 1996. Added November 7, 1996. Criterion September 22, 1978; criterion February 17, 1994. Griterion February 17, 1994. Griterion February 17, 1994. Griterion September 22, 1978; evaluation February 17, 1994.		9504	Criterion September 9, 1975; removed March 10, 1976.
9507 Added March 10, 1976; criterion February 3, 1988. 9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9521 Added March 10, 1976; criterion February 3, 1988. 9521 Added March 10, 1976; criterion February 3, 1988. 9521 Added March 10, 1976; criterion February 3, 1988. 9522 Added March 10, 1976; criterion February 3, 1988. 9523 Added March 10, 1976; criterion February 3, 1988. 9524 Added March 10, 1976; criterion February 3, 1988. 9525 Added March 10, 1976; criterion February 3, 1988. 9526 Added March 10, 1976; criterion February 7, 1996. 9526 Added March 10, 1976; criterion February 17, 1996. 9527 Added March 10, 1976; criterion February 17, 1994. 9528 Added March 10, 1976; criterion February 3, 1988. 9529 Added March 10, 1976; criterion February 3, 1988. 9520 Added March 10, 1976; criterion February 3, 1988. 9520 Added March 10, 1976; criterion February 3, 1988. 9520 Added March 10, 1976; criterion February 7, 1996. 9521 Added March 10, 1976; criterion February 7, 1996. 9522 Added March 10, 1976; criterion February 17, 1994. 9523 Oriterion February 17, 1994. 9524 Oriterion September 22, 1978; evaluation February 17, 1994. 9525 Oriterion September 22, 1978; evaluation February 17, 1994.			
9508 Added March 10, 1976; criterion February 3, 1988. 9509 Added March 10, 1976; criterion February 3, 1988. 9510 Added March 10, 1976; criterion February 3, 1988. 9511 Added March 10, 1976; criterion February 3, 1988. 9520 Added Movember 7, 1996. 9521 Added November 7, 1996. 14.132			
9509 Added March 10, 1976; criterion February 3, 1988. 4dded March 10, 1976; criterion February 3, 1988. 4ded November 7, 1996. 6dded November 7, 1996. 7dded November 7, 1994. 9900			
9510 Added March 10, 1976; criterion February 3, 1988. 4dded March 10, 1976; criterion February 3, 1988. 4dded Movember 7, 1996. 4.132			
9520 Added November 7, 1996. 4.132		9510	Added March 10, 1976; criterion February 3, 1988.
4.132			
4.150	4.400	9521	Added November 7, 1996.
9901 Criterion February 17, 1994. 9902 Criterion February 17, 1994. 9903 Criterion February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994.			
9902 Criterion February 17, 1994. 9903 Criterion February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994.	4.100		
9903 Criterion February 17, 1994. 9905 Criterion September 22, 1978; evaluation February 17, 1994.			
		9903	Criterion February 17, 1994.
9910 Removed February 17, 1994.

APPENDIX B TO PART 4—NUMERICAL INDEX OF DISABILITIES

Diagnostic Code No.	
	THE MUSCULOSKELETAL SYSTEM Acute, Subacute, or Chronic Diseases
5000	Osteomyelitis, acute, subacute, or chronic.
5001	Bones and Joints, tuberculosis.
5002	Arthritis, rheumatoid (atrophic).
5003	Arthritis, degenerative (hypertrophic or osteoarthritis).
5004	Arthritis, gonorrheal.
5005	Arthritis, pneumococcic.
5006	Arthritis, typhoid.
5007	Arthritis, syphilitic.
5008	Arthritis, streptococcic.
5009	Arthritis, other types (specify).
5010	Arthritis, due to trauma.
5011	Bones, caisson disease.
5012	Bones, new growths, malignant.
5013 5014	Osteoporosis, with joint manifestations.
5015	Osteomalacia.
5016	Bones, new growths, benign. Osteitis deformans.
5017	Gout.
5018	Hydrarthrosis, intermittent.
5019	Bursitis.
5020	Synovitis.
5021	Myositis.
5022	Periostitis.
5023	Myositis ossificans.
5024	Tenosynovitis.
5025	Fibromyalgia.
	Prosthetic Implants
5051	Shoulder replacement (prosthesis).
5052	Elbow replacement (prosthesis).
5053	Wrist replacement (prosthesis).
5054	Hip replacement (prosthesis).
5055	Knee replacement (prosthesis).
5056	Ankle replacement (prosthesis).
	Combination of Disabilities
5104	Anatomical loss of one hand and loss of use of one foot.
5105	Anatomical loss of one foot and loss of use of one hand.
5106	Anatomical loss of both hands.
5107	Anatomical loss of both feet.
5108	Anatomical loss of one hand and one foot.
5109	Loss of use of both hands.
5110	Loss of use of both feet.
5111	Loss of use of one hand and one foot.
	Amputations: Upper Extremity
Arm amputation of:	
5120	Disarticulation.
5121	Above insertion of deltoid.
5122	Below insertion of deltoid.
Earnerm amputation of	<u> </u>
Forearm amputation of: 5123	Above insertion of pronator teres.
5124	Below insertion of pronator teres.
J124	i below insertion of profitator teres.

Diagnostic Code No.				
5125	Hand, loss of use of.			
Multiple Finger Amputations				
5126	Five digits of one hand.			
Four digits of one hand:				
5127	Thumb, index, long and ring.			
5128	Thumb, index, long and little.			
5129 5130	Thumb, index, ring and little.			
5131	Thumb, long, ring and little. Index, long, ring and little.			
Three digits of one hand: 5132	Thumb, index and long.			
5133	Thumb, index and ring.			
5134	Thumb, index and little.			
5135	Thumb, long and ring.			
5136 5137	Thumb, long and little. Thumb, ring and little.			
5138	Index, long and ring.			
5139	Index, long and little.			
5140	Index, ring and little.			
5141	Long, ring and little.			
Two digits of one hand:	Though and index			
5142 5143	Thumb and index. Thumb and long.			
5144	Thumb and ring.			
5145	Thumb and little.			
5146	Index and long.			
5147 5148	Index and ring. Index and little.			
5149	Long and ring.			
5150	Long and little.			
5151	Ring and little.			
Single finger:				
5152	Thumb.			
5153 5154	Index finger. Long finger.			
5155	Ring finger.			
5156	Little finger.			
	Amputations: Lower Extremity			
	7 , 2			
Thigh amputation of: 5160	Disarticulation.			
5161	Upper third.			
5162	Middle or lower thirds.			
Leg amputation of:				
5163	With defective stump.			
5164	Not improvable by prosthesis controlled by natural knee action.			
5165	At a lower level, permitting prosthesis.			
5166 5167	Forefoot, proximal to metatarsal bones. Foot, loss of use of.			
5170	Toes, all, without metatarsal loss.			
5171	Toe, great.			
5172	Toes, other than great, with removal of metatarsal head.			
5173	Toes, three or more, without metatarsal involvement.			
	Shoulder and Arm			
5200	Scapulohumeral articulation, ankylosis.			
5201	Arm, limitation of motion.			
5202 5203	Humerus, other impairment. Clavicle or scapula, impairment.			
	Elbow and Forearm			
5205	Elbow, ankylosis.			
5206	Forearm, limitation of flexion.			
5207	Forearm, limitation of extension.			
5208	Forearm, flexion limited.			

Diagnostic Code No.

6822 Actinomycosis.	Bacterial Infections of the Lung		
	6822	Actinomycosis.	

38 CFR Ch. I (7-1-15 Edition)

Diagnostic Code No.	
	Nocardiosis.
	Chronic lung abscess.
	Interstitial Lung Disease
	Fibrosis of lung, diffuse interstitial.
	Desquamative interstitial pneumonitis.
	Pulmonary alveolar proteinosis.
	Eosinophilic granuloma.
	Drug-induced, pneumonitis & fibrosis. Radiation-induced, pneumonitis & fibrosis.
	Hypersensitivity pneumonitis.
	Pneumoconiosis.
	Asbestosis.
	Mycotic Lung Disease
	Histoplasmosis.
	Coccidioidomycosis.
	Blastomycosis.
	Cryptococcosis.
	Aspergillosis.
	Mucormycosis.
	Restrictive Lung Disease
	Diaphragm paralysis or paresis.
	Spinal cord injury with respiratory insufficiency.
	Kyphoscoliosis, pectus excavatum/carinatum.
	Traumatic chest wall defect.
	Post-surgical residual.
	Pleural effusion or fibrosis.
	Sarcoidosis.
	Sleep Apnea Syndromes.
	THE CARDIOVASCULAR SYSTEM Diseases of the Heart
	Valvular heart disease.
	Endocarditis.
	Pericarditis.
	Pericardial adhesions.
	Syphilitic heart disease.
	Arteriosclerotic heart disease.
	Myocardial infarction. Hypertensive heart disease.
	Hyperthyroid heart disease.
	Supraventricular arrhythmias.
	Ventricular arrhythmias.
	Atrioventricular block.
	Heart valve replacement.
	Coronary bypass surgery.
	Implantable cardiac pacemakers.
	Cardiac transplantation.
	Cardiomyopathy.
	Diseases of the Arteries and Veins
	Hypertensive vascular disease.
	Aortic aneurysm.
	Aneurysm, large artery.
	Aneurysm, small artery.
	Arteriovenous fistula, traumatic. Arteriosclerosis obliterans.
	Thrombo-angiitis obliterans (Buerger's Disease).
	Raynaud's syndrome.
	Angioneurotic edema.
	Erythromelalgia.
	Varicose veins.
	Post-phlebitic syndrome.
	Cold injury residuals.
	Soft tissue sarcoma.
	THE DIGESTIVE SYSTEM

THE GENITOURINARY SYSTEM

7500	Kidney, removal.
7501	Kidney, abscess.
7502	Nephritis, chronic.
7504	Pyelonephritis, chronic.
7505	Kidney, tuberculosis.
7507	Nephrosclerosis, arteriolar.
7508	Nephrolithiasis.
7509	Hydronephrosis.
7510	Ureterolithiasis.
7511	Ureter, stricture.
7512	Cystitis, chronic.
7515	Bladder, calculus.
7516	Bladder, fistula.
7517	Bladder, injury.
7518	Urethra, stricture.
7519	Urethra, fistula.
7520	Penis, removal of half or more.
7521	Penis, removal of glans.
7522	Penis, deformity, with loss of erectile power.
7523	Testis, atrophy, complete.
7524	Testis, removal.

	Diagnostic Code No.	
7525		Epididymo-orchitis, chronic only.
		Prostate gland.
		Malignant neoplasms.
		Benign neoplasms.
		Renal disease, chronic. Kidney transplant.
		Renal tubular disorders.
		Kidneys, cystic diseases.
		Atherosclerotic renal disease.
		Toxic nephropathy.
		Glomerulonephritis.
		Interstitial nephritis.
		Papillary necrosis. Renal amyloid disease.
		Disseminated intravascular coagulation.
		Renal involvement in systemic diseases.
		Neurogenic bladder.
	GYN	ECOLOGICAL CONDITIONS AND DISORDERS OF THE BREAST
		Vulva, disease or injury.
		Vagina, disease or injury. Cervix, disease or injury.
		Uterus, disease or injury.
		Fallopian tube, disease or injury.
		Ovary, disease or injury.
7617		Uterus and both ovaries, removal.
		Uterus, removal.
		Ovary, removal.
		Ovaries, atrophy of both.
		Uterus, prolapse. Uterus, displacement.
		Pregnancy, surgical complications.
		Fistula, rectovaginal.
		Fistula, urethrovaginal.
		Breast, surgery.
		Malignant neoplasms.
		Benign neoplasms.
7629		Endometriosis.
		THE HEMIC AND LYMPHATIC SYSTEMS
		Anemia.
		Agranulocytosis, acute.
		Leukemia.
		Polycythemia vera. Thrombocytopenia.
		Splenectomy.
		Spleen, injury of, healed.
		Hodgkin's disease.
7710		Adenitis, tuberculous.
		Sickle cell anemia.
		Non-Hodgkin's lymphoma.
		Aplastic anemia.
7/1/		AL amyloidosis (primary amyloidosis).
		THE SKIN
7800		Burn scar(s) of the head, face, or neck; scar(s) of the head, face, or neck due to other causes; or other disfigurement of the head, face, or neck.
7801		Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are deep and nonlinear.
7802		Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are superficial and nonlinear.
		Scar(s), unstable or painful.
		Scars, other.
		Dermatitis or eczema.
		Leishmaniasis, American (New World).
		Leishmaniasis, Old World.
		Lupus erythematosus, discoid. Tuberculosis luposa (lupus vulgaris).
		Dermatophytosis.
		Bullous disorders.
		Psoriasis.

Diagnostic Code No.	
7817	Exfoliative dermatitis.
7818	Malignant skin neoplasms.
7819	Benign skin neoplasms.
7820	Infections of the skin.
7821	Cutaneous manifestations of collagen-vascular diseases.
7822	Papulosquamous disorders.
7823	Vitiligo.
7824	Keratinization, diseases.
7825 7826	Urticaria.
7827	Vasculitis, primary cutaneous. Erythema multiforme.
7828	Acne.
7829	Chloracne.
7830	Scarring alopecia.
7831	Alopecia areata.
7832	Hyperhidrosis.
7833	Malignant melanoma.
	THE ENDOCRINE SYSTEM
7900	Hyperthyroidism.
7901	Thyroid gland, toxic adenoma.
7902	Thyroid gland, nontoxic adenoma.
7903	Hypothyroidism.
7904	Hyperparathyroidism.
7905	Hypoparathyroidism.
7907 7908	Cushing's syndrome. Acromegaly.
7909	Diabetes insipidus.
7911	Addison's disease.
7912	Pluriglandular syndrome.
7913	Diabetes mellitus.
7914	Malignant neoplasm.
7915	Benign neoplasm.
7916 7917	Hyperpituitarism. Hyperaldosteronism.
7918	Pheochromocytoma.
7919	C-cell hyperplasia, thyroid.
NI	UROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS Organic Diseases of the Central Nervous System
8000	Encephalitis, epidemic, chronic.
	Brain, New Growth of
8002	Malignant.
8003	Benign.
8004	Paralysis agitans.
8005	Bulbar palsy.
8007	Brain, vessels, embolism.
8008 8009	Brain, vessels, thrombosis. Brain, vessels, hemorrhage.
8010	Myelitis.
8011	Poliomyelitis, anterior.
8012	Hematomyelia.
8013	Syphilis, cerebrospinal.
8014	Syphilis, meningovascular.
8015 8017	Tabes dorsalis.
8018	Amyotrophic lateral sclerosis. Multiple sclerosis.
8019	Meningitis, cerebrospinal, epidemic.
8020	Brain, abscess.
	Spinal Cord, New Growths
0004	
8021 8022	Malignant. Benign.
8023	Progressive muscular atrophy.
8024	Syringomyelia.
8025	Myasthenia gravis.
8045	Residuals of traumatic brain injury (TBI).
0040	
8046	Cerebral arteriosclerosis.

	Diagnostic Code No.	
		Miscellaneous Diseases
3100		Migraine
		Tic, convulsive.
		Paramyoclonus multiplex.
		Chorea, Sydenham's.
		Chorea, Huntington's.
		Athetosis, acquired.
108		Narcolepsy.
		The Cranial Nerves
		Fifth (trigeminal), paralysis.
		Seventh (facial), paralysis.
		Ninth (glossopharyngeal), paralysis.
		Tenth (pneumogastric, vagus), paralysis.
		Eleventh (spinal accessory, external branch), paralysis. Twelfth (hypoglossal), paralysis.
		Neuritis, fifth cranial nerve.
		Neuritis, seventh cranial nerve.
		Neuritis, ninth cranial nerve.
		Neuritis, tenth cranial nerve.
		Neuritis, eleventh cranial nerve.
		Neuritis, twelfth cranial nerve.
		Neuralgia, fifth cranial nerve.
		Neuralgia, seventh cranial nerve.
		Neuralgia, ninth cranial nerve.
		Neuralgia, tenth cranial nerve.
		Neuralgia, eleventh cranial nerve.
3412		Neuralgia, twelfth cranial nerve.
		Peripheral Nerves
3510		Upper radicular group, paralysis.
		Middle radicular group, paralysis.
		Lower radicular group, paralysis.
		All radicular groups, paralysis.
		Musculospiral nerve (radial), paralysis.
		Median nerve, paralysis.
		Ulnar nerve, paralysis. Musculocutaneous nerve, paralysis.
		Circumflex nerve, paralysis.
		Long thoracic nerve, paralysis.
		Sciatic nerve, paralysis.
		External popliteal nerve (common peroneal), paralysis.
3522		Musculocutaneous nerve (superficial peroneal), paralysis.
3523		Anterior tibial nerve (deep peroneal), paralysis.
		Internal popliteal nerve (tibial), paralysis.
		Posterior tibial nerve, paralysis.
		Anterior crural nerve (femoral), paralysis.
		Internal saphenous nerve, paralysis.
		Obturator nerve, paralysis.
		External cutaneous nerve of thigh, paralysis.
		Ilio-inguinal nerve, paralysis.
		Soft-tissue sarcoma (Neurogenic origin). Neuritis, upper radicular group.
		Neuritis, middle radicular group.
		Neuritis, Indule radicular group.
		Neuritis, all radicular group.
		Neuritis, musculospiral (radial) nerve.
		Neuritis, median nerve.
		Neuritis, ulnar nerve.
		Neuritis, musculocutaneous nerve.
8616		
3616 3617 3618		Neuritis, circumflex nerve.
3616 3617 3618 3619		Neuritis, circumflex nerve. Neuritis, long thoracic nerve.
3616 3617 3618 3619 3620		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve.
3616 3617 3618 3619 3620 3621		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve.
8616 8617 8618 8619 8620 8621 8622		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve. Neuritis, musculocutaneous (superficial peroneal) nerve.
8616 8617 8618 8619 8620 8621 8622 8623		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve. Neuritis, musculocutaneous (superficial peroneal) nerve. Neuritis, anterior tibial (deep peroneal) nerve.
3616 3617 3618 3619 3620 3621 3622 3623 3624		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve. Neuritis, musculocutaneous (superficial peroneal) nerve. Neuritis, anterior tibial (deep peroneal) nerve. Neuritis, anterior politeal (tibial) nerve.
3616 3617 3618 3619 3620 3621 3622 3623 3624 3625		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve. Neuritis, musculocutaneous (superficial peroneal) nerve. Neuritis, anterior tibial (deep peroneal) nerve. Neuritis, internal popliteal (tibial) nerve. Neuritis, posterior tibial nerve.
3616 3617 3618 3619 3620 3621 3622 3623 3624 3625 3626		Neuritis, circumflex nerve. Neuritis, long thoracic nerve. Neuritis, sciatic nerve. Neuritis, external popliteal (common peroneal) nerve. Neuritis, musculocutaneous (superficial peroneal) nerve. Neuritis, anterior tibial (deep peroneal) nerve. Neuritis, anterior politeal (tibial) nerve.

Diagnostic Code No.	
8629	Neuritis, external cutaneous nerve of thigh.
8630	Neuritis, ilio-inguinal nerve.
8710	Neuralgia, upper radicular group.
8711	
8712 8713	Neuralgia, lower radicular group. Neuralgia, all radicular groups.
8714	
8715	Neuralgia, median nerve.
8716	Neuralgia, ulnar nerve.
8717	Neuralgia, musculocutaneous nerve.
8718	Neuralgia, circumflex nerve.
8719	
8720	
8721 8722	Neuralgia, external popliteal nerve (common peroneal). Neuralgia, musculocutaneous nerve (superficial peroneal).
8723	
8724	Neuralgia, internal popliteal nerve (tibial).
8725	
8726	
8727	Neuralgia, internal saphenous nerve.
8728	Neuralgia, obturator nerve.
8729 8730	Neuralgia, external cutaneous nerve of thigh. Neuralgia, ilio-inquinal nerve.

6.20 Jurisdiction.

APPEALS

6.21 Guardian: definition and authority.

AUTHORITY: 38 U.S.C. 501, 1940-1963, 1981-1988, unless otherwise noted.

AGE

§ 6.1 Misstatement of age.

If the age of the insured under a United States Government life insurance policy has been understated, the amount of the insurance payable under the policy shall be such exact amount as the premium paid would have purchased at the correct age; if overstated, the excess of premiums paid shall be refunded without interest. Guaranteed surrender and loan values will be modified accordingly. The age of the insured will be admitted by the Department of
